

Shine Works Supply & Capital Pressure Supply Launch Elite "Total Cleaning Hub" in Manassas

Northern Virginia's new super-center combines premium auto detailing supplies with industrial pressure washing equipment, offering a more comprehensive inventory than Spray Supply Company or local detailing supply stores across the world.

Manassas, Virginia Apr 28, 2026 ([IssueWire.com](https://www.IssueWire.com)) - As the demand for high-performance cleaning technology surges in Northern Virginia, **Shine Works Supply** is redefining the industry standard. By officially partnering and co-locating with **Capital Pressure Supply** at their 11900 Livingston Road Suite 139 facility, they have created a "Total Cleaning Hub" that provides a level of inventory and technical service unmatched by traditional outlets like **Detailing Supply Stores Around The World** or Another **Spray Supply Company**.

For years, professionals in the DMV have had to visit multiple **pressure washing supply stores** for bulk chemicals and then travel to separate **auto detailing supply stores** for ceramic coatings and polishers. Shine Works Supply has ended this fragmentation.

"Our mission was to build a bridge between the high-end aesthetic world of detailing and the heavy-duty industrial power of pressure washing," says the Shine Works team. "While competitors like Other Detailing Stores focus on the car enthusiast, and another Local Spray Company focuses on the machine, we have integrated both. You can now pick up **Starke Yacht Care** marine coatings and a custom-built hot water pressure washing unit in the same transaction."

The Manassas and Fredericksburg locations serve as authorized dealer hubs for industry-leading brands, including **Starke**, **Tornador**, and **Technician's Choice**. Unlike general supply stores, the Shine Works and Capital Pressure partnership offers:

- **Elite Marine & Auto Supplies:** A massive inventory of ceramic coatings, compounds, and

pads.

- **Industrial Power Equipment:** Full sales and service for Honda and Vanguard-powered units.
- **Fresh Bulk Chemicals:** 12.5% Sodium Hypochlorite (SH) and high-performance degreasers.
- **Expert Repair Center:** On-site industrial small engine and pump repair to eliminate contractor downtime.

This strategic "Super-Hub" model is designed specifically for professionals who need more than just a retail shelf. By providing ECP-certified training and equipment rentals, Shine Works Supply is the new primary destination for any contractor looking to scale their business in the Northern Virginia area.

About Shine Works Supply: Shine Works Supply is Northern Virginia's premier source for professional detailing and marine care products. Specializing in high-performance brands like Starke Yacht Care, they provide the tools and training necessary for a showroom finish.

About Capital Pressure Supply: Capital Pressure Supply is the DMV's leading authority on industrial pressure washing equipment, bulk chemical distribution, and small engine repair.
