

# Sonic Facelift Scottsdale Grand Opening

Scottsdale Welcomes Sonic Facelift™: A New Era of Non-Invasive Facial Rejuvenation Arrives in the Valley

**Scottsdale, Arizona Apr 2, 2026** ([IssueWire.com](https://www.IssueWire.com)) - A new approach to facial rejuvenation has arrived in Scottsdale, offering a refined alternative to injectables and traditional aesthetic treatments. **Sonic Facelift Scottsdale** officially opens this April, introducing **The Sonic Facelift Experience™**, a 90-minute, non-invasive treatment designed to support visible lift, facial harmony, and overall vitality through precision sound frequency.

Located inside **The Arizona Skin Bar** at **3014 N Hayden Rd #102, Scottsdale, AZ**, Sonic Facelift Scottsdale operates as an independent business within one of the city's premier skincare destinations.

## A Different Approach to Facial Rejuvenation

At a time when many clients are seeking more natural, subtle results, Sonic Facelift™ offers an alternative rooted in **vibrational acoustics, nervous-system regulation, and facial meridian work**.

Using calibrated tuning forks, LED light therapy, and targeted frequency application, the experience works to:

- Support natural lift and facial tone
- Release tension patterns in the face, jaw, and neck
- Encourage healthy circulation and skin vitality
- Promote a rested, refined appearance without injectables

Rather than forcing change, the method works with the body's own systems—allowing results to build gradually and remain understated.

Founded by Certified Practitioner Tami Holly

Sonic Facelift Scottsdale is led by **certified practitioner Tami Holly**, trained in the **Wakefield Technique of Facial Soundscapes**.

With a background rooted in precision-based, holistic modalities, Holly brings a highly intentional approach to facial rejuvenation—combining sound frequency, meridian work, and nervous-system regulation into a cohesive, results-oriented experience.

Each session is customized in real time, using specific frequencies selected to address the client's unique facial patterns, tension points, and desired outcomes.

## Why Scottsdale, Why Now

Scottsdale continues to evolve as a destination for both aesthetic innovation and luxury wellness. While injectables remain widely available, there is a growing shift toward treatments that prioritize **subtlety**,

## **longevity, and whole-system balance.**

Sonic Facelift™ enters the market as clients increasingly seek options that support how they look and how they feel—without aggressive intervention.

### Beyond Aesthetics: Regulation, Recovery, and Function

While visible refinement is a key outcome, many clients are drawn to the experience for its broader benefits, including:

- Nervous-system regulation
- Reduction of jaw tension and facial holding patterns
- Support for stress-related discomfort
- A greater sense of calm and overall balance

A dedicated **Sonic Facelift™ Gentleman** experience is also available, designed for men seeking recovery, circulation support, and a composed, refined appearance without cosmetic procedures.

### Additional Modalities Available

In addition to Sonic Facelift™, Tami Holly offers a range of complementary modalities designed to support overall wellness and vitality.
