

TekWissen Wins CareCon MedTech Innovation Award

Ann Arbor, Michigan Apr 18, 2026 ([IssueWire.com](https://www.issuewire.com)) - Setting a new benchmark in intelligent hospital asset management

TekWissen Software Pvt. Ltd. proudly announces that its solution, MIRA (Managed Intelligence for Resources & Assets), has been honoured with the CareCon MedTech Innovation Award, recognising its real-world impact in transforming hospital operations across emerging healthcare markets.

Transforming Hospital Asset Intelligence

MIRA is redefining how hospitals track, manage, and optimise critical medical assets. Powered by BLE Mesh technology, cloud intelligence, and AI-ready analytics, MIRA delivers room-level visibility for high-value equipment such as ventilators, infusion pumps, surgical instruments, and patient monitors — without dependency on Wi-Fi infrastructure.

“MIRA was born from a deep understanding of operational challenges faced by hospitals across emerging markets. This recognition validates our commitment to building innovation that works in real conditions, not ideal ones.”

- Sanjeev Senta, Managing Director & CTO, TekWissen Software Ltd.

Proven Impact in Real Healthcare Environments

- 99% reduction in asset search time (hours → under 1 minute)
- 85% reduction in asset misplacement incidents
- 75%+ utilisation improvement from the typical 42% baseline
- 80% compliance workflows are automated, enabling clinicians to focus on patient care

“By focusing on practical deployment environments and cost efficiency, we are enabling hospitals to adopt advanced asset intelligence without infrastructure limitations.”

- Rajeev Senta, CEO – TekWissen Group (APAC & Emerging Markets)

Receiving the award on behalf of TekWissen, Akash Srivastava highlighted the importance of combining healthcare domain expertise with disciplined engineering to create solutions that achieve global relevance and measurable clinical impact.
