

## TRUEic LLC Launches Yntava, the World's First Trust Intelligence Engine

Yntava introduces a new trust layer for the internet, combining behavioral intelligence, threat-feed analysis, and identity scoring into a single verification engine.

**Cincinnati, Ohio Apr 25, 2026** ([Issuewire.com](http://Issuewire.com)) - **TRUEic LLC**, a behavioral-technology company specializing in advanced intelligence systems, today announced the launch of **YNTAVA™**, the world's first Trust Intelligence Engine™ - a new category of real-time digital verification designed to determine what's legitimate before users interact with it.

As online scams, impersonation attempts, synthetic identities, and fraudulent accounts continue to rise, businesses are struggling to protect users with outdated verification tools. **YNTAVA™** introduces a new solution: real-time trust scoring powered by multi-signal intelligence™, built to verify identity, intent, and legitimacy in seconds

## **What YNTAVA™ Is** — A New Category Created by TRUEic LLC

**YNTAVA™** is a Trust Intelligence™ Platform that helps businesses and consumers verify what's real online. It operates across three core product surfaces:

### **ScamCheck™** — Consumer Trust Scanner

ScamCheck allows anyone to scan emails, phone numbers, URLs, or usernames and instantly receive a trust score and risk tier.

Every user receives three free lifetime scans, with additional scans available through credit packs or paid plans.

### **Y-Verify™** — Developer Trust API

A REST API that businesses integrate into onboarding flows, fraud checks, and identity verification pipelines.

**Y-Verify™** provides programmatic trust scoring using rate-limited, metered API keys.

### **Trust Graph™** — Behavioral Intelligence Engine™

Yntava's v3 intelligence layer aggregates behavioral patterns, threat-feed data (PhishTank, URLhaus, OpenPhish), IP/ISP/location signals, and digital fingerprints to generate a composite trust score in real time.

## **Why Trust Intelligence™ Matters**

Traditional verification tools focus on identity, not intent.

**YNTAVA™** introduces behavioral trust, risk tiering, and multi-signal legitimacy scoring, enabling platforms to detect:

- *fake accounts*
- *scam messages*
- *suspicious links*
- *synthetic identities*
- *impersonation attempts*
- *fraud patterns before they happen*

This positions YNTAVA™ as “the first trust layer for the internet”.

## Availability

YNTAVA™ is now live at <https://yntava.com> with subscription tiers including Trial, Starter, Growth, and Business.

**ScamCheck™** credit packs are available for high-volume scanning.

## About TRUEic LLC

TRUEic LLC is a behavioral-technology company focused on building advanced intelligence systems, digital trust infrastructure, and category-defining platforms. TRUEic develops proprietary engines, frameworks, and intelligence architectures that power next-generation digital safety, identity verification, trust-based decisioning and so much more.
