

## Viking Bags Introduces Updated ADV Hard Cases Built for Mixed Terrain Riding

The Viking Bags Apex XL series pairs a 38-liter ADV top case with a 45-liter side case set, both built around a tool-free quick-disconnect mount and shipped with LED lights and a solar power bank.

**Los Angeles, California Apr 30, 2026** ([Issuewire.com](http://Issuewire.com)) - Viking Bags, a maker of motorcycle luggage and aftermarket parts, has added the Apex XL aluminum hard case series to its ADV touring lineup. The new range includes a [38-liter ADV top case](#) and a [45-liter ADV side case pair](#), designed for riders who cover both paved roads and rough off-road trails.

Both top and side cases are made from aluminum with precision welding and self-piercing riveting, which seals out water and dust even in wet or muddy terrain. Each unit carries an ideal waterproof rating. Glass-fiber caps at the corners protect against minor drops and contact during tight cornering, a detail that matters when the trail narrows.

Storage figures are direct: the top case holds 2,300 cubic inches, enough for a full-face helmet, at dimensions of 16" x 13.5" x 13". The [BMW R 1250 GS aluminum side cases](#) and their matching

versions for other bikes each measure 19.3" × 9" × 14.6", adding a combined 2,746 cubic inches of storage as a pair, with each case rated to hold up to 22 lbs of load.

A quick-disconnect system (QDS) lets riders remove or attach the cases without tools, useful for those who switch between daily commuting and longer tours on the same bike. All needed mounting hardware ships with each order. The side case lids detach via a quick-release fastener, which speeds up loading at camp or trailheads.

Four tie-down loops on each lid allow extra gear to be strapped on top when needed. An internal organizer, stainless steel hinges, and aluminum carry handles are part of the build. Each set also ships with a pair of LED lights and a solar-powered power bank, items that are clearly useful on remote routes or overnight stops away from power.

The Apex XL series fits a broad range of ADV bikes from BMW, Harley-Davidson, Honda, Kawasaki, Triumph, Yamaha, Suzuki, and Royal Enfield. Both silver and black finishes are available. Full fitment details, including [ADV aluminum top cases](#), are listed by model at [Viking Bags](#).

## About Viking Bags

Viking Bags is a maker of motorcycle luggage and aftermarket parts, with a range covering hard-shell and leather saddlebags, tank bags, sissy bar bags, and ADV touring luggage. The company also produces ready-to-install aftermarket motorcycle parts, including handlebars, fairings, crash bars, and seats, for major brands such as Harley-Davidson, Honda, Yamaha, and Indian.
