

Vortex Air Expands High-Quality Ventilation Cleaning Services Across Montreal and Surrounding Areas

Vortex Air expands its high-quality ventilation cleaning services across Montreal and nearby areas, offering expert air duct cleaning, inspection, and indoor air quality solutions to improve comfort

Montreal, Quebec Apr 6, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Vortex Air, a premier provider of professional ventilation system decontamination services, announces the expansion of its comprehensive air duct cleaning and HVAC maintenance services throughout Montreal and surrounding regions including Laval, Longueuil, North Shore, and South Shore communities.

With indoor air quality becoming an increasing concern for residential and commercial property owners, [Vortex Air](#) responds to growing market demand by extending its certified services to a broader geographic area. The company specializes in complete ventilation system decontamination, dryer vent cleaning, and air exchanger maintenance using industry-leading equipment and NADCA-certified techniques.

"Property owners across Greater Montreal deserve access to professional ventilation cleaning services that genuinely improve indoor air quality," said [Spokesperson Name], [Title] at Vortex Air. "Our expansion allows us to serve more families and businesses with the thorough, certified decontamination services that remove allergens, mold spores, bacteria, and accumulated debris from ventilation systems."

Comprehensive Service Offerings

Vortex Air provides complete ventilation system solutions including:

- **Air Duct Decontamination:** HEPA-powered negative pressure systems remove dust, mold, pollen, and biological contaminants from residential and commercial ductwork
- **Dryer Vent Cleaning:** Complete lint removal from dryer exhaust systems reducing fire risks and improving appliance efficiency
- **Air Exchanger (HRV/ERV) Maintenance:** Core cleaning, filter replacement, and condensate drain servicing to maintain optimal heat recovery performance
- **Commercial HVAC Cleaning:** Specialized decontamination for office buildings, restaurants, hospitals, and multi-unit residential properties

NADCA-Certified Standards

All Vortex Air technicians follow protocols established by the National Air Duct Cleaners Association (NADCA), ensuring professional-grade cleaning that exceeds industry standards. The company utilizes high-powered HEPA filtration equipment capturing 99.97% of particles down to 0.3 microns, combined with rotating brush systems that remove stubborn biofilms and accumulated residues.

"We don't just move dust around—we remove it completely," [Spokesperson] emphasized. "Our before-and-after video inspections document the transformation, giving clients visual proof of the contamination removed from their ventilation systems."

Health and Safety Benefits

Regular ventilation system decontamination provides measurable benefits for Montreal-area properties:

- Reduced respiratory symptoms, allergies, and asthma triggers
- Elimination of persistent musty odors indicating mold growth
- Improved HVAC system efficiency reducing energy costs
- Extended equipment lifespan through reduced mechanical strain
- Compliance with commercial building air quality regulations

Serving Greater Montreal Communities

The expanded service area now includes:

- **Montreal:** All boroughs including Ville-Marie, Plateau Mont-Royal, Rosemont, Verdun, and Côte-des-Neiges
- **Laval:** Complete coverage across all districts
- **Longueuil:** South Shore service including Brossard, Saint-Lambert, and surrounding municipalities
- **North Shore:** Terrebonne, Blainville, Mirabel, and neighboring communities
- **West Island:** Pointe-Claire, Dorval, Beaconsfield, and adjacent areas

Residential and Commercial Expertise

Vortex Air serves both residential homeowners and commercial property managers with customized cleaning protocols:

Residential Services: Single-family homes, condominiums, and townhouses benefit from complete

ventilation cleaning every 3-5 years, with more frequent service recommended for homes with pets, recent renovations, or occupants with respiratory sensitivities.

Commercial Services: Office buildings, restaurants, hotels, hospitals, schools, and daycare centers receive annual or semi-annual decontamination maintaining regulatory compliance and protecting occupant health.

Free Estimates and Flexible Scheduling

Vortex Air offers complimentary on-site assessments with no-obligation detailed estimates. Scheduling accommodates client availability including evening and weekend appointments for residential properties and after-hours service for commercial facilities minimizing business disruptions.

"We understand that ventilation cleaning is an investment in health and property value," [Spokesperson] noted. "Our transparent pricing, detailed proposals, and satisfaction guarantees give clients confidence in choosing Vortex Air."

Environmental Commitment

The company prioritizes environmentally responsible practices using Health Canada-approved antimicrobial treatments when necessary and disposing of collected contaminants according to municipal waste management regulations. Energy efficiency improvements resulting from clean HVAC systems contribute to reduced carbon footprints across the Greater Montreal region.

About Vortex Air

Vortex Air is a professional ventilation system decontamination company serving Montreal and surrounding areas. Specializing in residential and commercial air duct cleaning, dryer vent maintenance, and HVAC system optimization, Vortex Air employs NADCA-certified techniques and state-of-the-art equipment to improve indoor air quality and system performance. The company is committed to transparency, customer education, and measurable results documented through comprehensive before-and-after inspections.
