

## Wonestop Launches WhatsApp Automation Platform for Marketing, OTP and Customer Engagement

Businesses can now automate campaigns, send OTPs, manage customer chats and improve conversions with Wonestop's official WhatsApp solutions.

**Mumbai, Maharashtra Apr 17, 2026 ([Issuewire.com](https://www.issuewire.com))** - Wonestop, a growing business messaging technology platform, today announced the expansion of its WhatsApp automation solutions designed to help businesses improve customer communication, generate leads, and automate repetitive workflows.

Built for modern businesses, Wonestop enables brands to use official WhatsApp messaging for marketing campaigns, OTP authentication, utility notifications, customer support, and sales engagement.

The platform offers features including bulk WhatsApp messaging, shared team inbox, campaign

automation, contact segmentation, message templates, analytics, and CRM integrations.

“With businesses shifting toward faster and more direct communication channels, WhatsApp has become essential. Wonestop is focused on making enterprise-grade WhatsApp automation simple, affordable, and scalable,” said a company spokesperson.

Wonestop serves startups, SMEs, agencies, e-commerce brands, educational institutes, healthcare businesses, and enterprises looking to improve response rates and customer engagement.

**Businesses can use Wonestop to:**

- Send promotional campaigns
- Deliver OTP and verification messages
- Share reminders and alerts
- Automate lead follow-ups
- Improve customer support response times
- Scale communication with verified messaging
