Strategic Trend Monitoring

Gain a high-level view of your shipping health with comprehensive time-series tracking. Monitor fluctuations in total spend, volume, and cost-per-pound (\$/LB) across your entire carrier mix and specific service levels. This allows 3PLs to identify seasonal patterns, detect sudden cost spikes, and validate the impact of rate changes over time.

New York City, New York Apr 15, 2026 ([IssueWire.com](https://www.issuewire.com)) - Your Shipping Data, an innovative new logistics technology solution, today announced the official launch of its platform designed to simplify how businesses access, organize, and utilize their shipping information. By providing a unified interface for data from major carriers—including FedEx, UPS, USPS, and DHL—the service eliminates the technical hurdles often associated with multi-carrier logistics management.

In an industry where shipping data is frequently siloed across different carrier portals and formatted inconsistently, Your Shipping Data offers a streamlined alternative. The platform automatically cleans and structures raw data, delivering a "homogenized" view that allows businesses to gain immediate insights into their shipping operations without the need for complex custom integrations.

"Managing shipping data across multiple providers has historically been a manual, time-consuming process," said Agni Sharma, VP Product at Your Shipping Data. "We built this platform to give businesses a single source of truth. By making data accessibility effortless and free, we are empowering companies to spend less time on spreadsheets and more time optimizing their supply chain and improving their bottom line."

Key Features of Your Shipping Data Include:

- **Multi-Carrier Integration:** Connect and aggregate data from FedEx, UPS, USPS, and DHL in one centralized location.
- **Data Homogenization:** Automatically clean and structure disparate data sets for seamless Business Intelligence (BI) analysis and reporting.
- **Effortless Accessibility:** A user-friendly interface designed for quick downloads and easy navigation of historical shipment records.
- **Free Model:** In a commitment to accessibility, the service is free for up to 100,000 parcels per week, requiring no credit card to sign up.

The launch of Your Shipping Data comes at a critical time as e-commerce and global logistics become increasingly data-dependent. By providing a "BI-ready" data stream, the platform helps logistics managers, financial analysts, and small business owners identify cost-saving opportunities and track carrier performance with unprecedented ease.

About Your Shipping Data

Your Shipping Data is a logistics technology platform dedicated to making shipping information more accessible and actionable. By bridging the gap between major carriers and business intelligence tools, Your Shipping Data provides the infrastructure companies need to master their shipping data and drive operational efficiency.

Your Shipping Data

PARCEL ANALYTICS

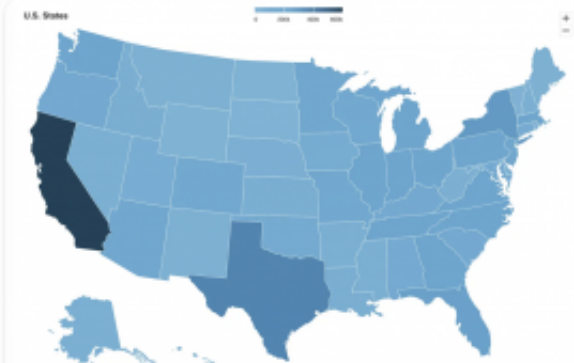

Dimensional & Density Mapping

Master the relationship between package weight and distance. This matrix analysis breaks down spend and volume by Weight vs. Zone, revealing exactly where your shipping profile is most—and least—cost-effective. Use these insights to optimize your distribution footprint, adjust packaging strategies, and identify the "sweet spots" for specific carrier-ship-via combinations.

Your Shipping Data

PARCEL ANALYTICS

Precision Geo-Spatial Analytics

Visualize your shipping impact with granular state and county-level mapping. Analyze spend, \$/LB, and delivery volume geographically to uncover regional cost disparities. For 3PLs, this provides the transparency needed to advise clients on warehouse placement and regional carrier utilization, ensuring every shipment follows the most economical path to the final mile.
