

Zoice Drives Adoption of AI Avatars Across Global Businesses

Zoice is an AI-powered platform designed to create realistic AI avatars that can speak and present content just like a real person. It allows users to generate videos by simply entering a script, eliminating the need for constant recording.

Noida, Uttar Pradesh Apr 8, 2026 ([Issuewire.com](https://www.Issuewire.com)) - [Zoice](#), founded by Praneet Thakur, is contributing to the increasing adoption of AI avatars across global businesses by providing tools that simplify video communication and content production.

Businesses are [adopting AI avatars](#) to replace traditional video workflows that require recording, editing, and repeated production efforts. Zoice enables this shift by allowing users to generate videos directly from text using digital avatars that replicate human expressions, voice, and delivery.

The platform is being used by organizations to standardize communication across teams and regions. With AI avatars, businesses can create consistent video content for marketing, employee training, product explanations, and customer interaction without relying on physical production setups.

Zoice supports large-scale adoption by making video creation process-driven. Users can generate multiple videos in a short time while maintaining uniform quality. This allows businesses to scale communication without increasing production complexity.
