Bedford, Massachusetts May 25, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Invisible Touch Inc., a full-service auto body shop at 5 Y D Rd in Bedford, MA, continues to serve Greater Boston drivers after more than four decades of operation. Founded in 1984 by Edwin Alexanderian, the shop has evolved from its original collision repair focus into a comprehensive auto body facility offering advanced paint protection, specialty services, and luxury vehicle repair.

The shop's current service menu includes collision repair with computerized frame straightening, painless dent repair for door dings and hail damage, ceramic coating including graphene formulations, paint protection film installation, professional auto painting with computer color matching, paint correction, auto detailing, and wheel and rim repair.

In recent years, Invisible Touch Inc. has expanded into specialized body repair for European luxury vehicles, serving Audi, BMW, Mercedes-Benz, and Porsche owners throughout the Lexington, Concord, Lincoln, and Weston corridor. Each luxury repair follows manufacturer-specific procedures for the vehicle's body materials and finish systems.

“The vehicles we work on today are built with materials and technology that didn’t exist when we opened in 1984,” said Edwin Alexanderian, owner of Invisible Touch Inc. “Aluminum body panels, multi-stage paint systems, advanced driver assistance systems — every one of these requires a different approach than what we used on vehicles 20 years ago. We’ve invested in the equipment and training to handle modern vehicles correctly.”

The shop works directly with all major insurance carriers for collision repair claims and provides free written estimates for all services. Walk-in consultations are available during business hours.
