

Booth Fabricators Announces Exhibition Booth Design Support for Auto Aftermarket Show 2026 Exhibitors in Chennai

Booth Fabricators offers booth design, fabrication, branding, and installation support for Auto Aftermarket Show 2026 exhibitors in Chennai.

Chennai, Tamil Nadu May 23, 2026 (Issuewire.com) - Booth Fabricators has announced dedicated exhibition booth design and fabrication support for companies preparing to exhibit at [Auto Aftermarket Show 2026](#), scheduled for **31 July to 2 August 2026** at Chennai Trade Centre, Nandambakkam, Chennai.

The event is expected to bring together automotive aftermarket brands, auto parts manufacturers, EV component suppliers, diagnostics companies, garage equipment providers, lubricants brands, repair solution companies, and workshop technology providers. For exhibitors, the show presents an opportunity to connect with distributors, workshop owners, fleet operators, retailers, service equipment buyers, and automotive business decision-makers from South India and nearby markets.

To support these exhibitors, **Booth Fabricators** is offering complete booth planning, exhibition stall design, fabrication, branding, installation, and on-site execution services for automotive and industrial exhibitors participating in the Chennai event. More details are available at:

Automotive exhibitions require more than attractive booth graphics. Many exhibitors need practical layouts for product demonstrations, tool displays, spare parts shelving, equipment placement, technical explanation zones, storage, meeting space, electrical planning, and visitor movement. Booth Fabricators plans exhibition stalls around these requirements so that brands can present products clearly while supporting lead generation and buyer conversations.

“Automotive trade show booths need to be designed for both visibility and function,” said a spokesperson for Booth Fabricators. “At events such as Auto Aftermarket Show 2026, exhibitors often display technical products, components, tools, diagnostic equipment, EV solutions, or workshop systems. A booth should help visitors understand the product quickly, interact with the display, and speak with the exhibitor’s team without congestion.”

Booth Fabricators’ services for Auto Aftermarket Show 2026 exhibitors include custom [exhibition stall design](#), modular booth construction, double-decker exhibition stands for larger spaces, large-format branding, backlit signage, product display counters, meeting zones, AV integration, flooring, lighting, furniture, booth installation, and dismantling after the event.

The company also supports exhibitors that need compact modular booths for standard spaces as well as larger custom-built stalls for premium brand visibility. For automotive parts, EV components, garage equipment, diagnostics systems, and industrial products, the team focuses on booth layouts that improve product visibility and create clear visitor pathways.

Chennai’s role as a strong automotive and manufacturing hub makes the event especially relevant for companies targeting South India’s aftermarket, component, service, and mobility sectors. Exhibitors planning their participation early can benefit from better booth layout planning, clearer branding, improved material selection, and smoother venue coordination.

Booth Fabricators recommends that exhibitors begin booth planning well ahead of the event date to allow time for 3D design concepts, branding approvals, structural planning, production, logistics, installation scheduling, and final on-site checks.

Companies participating in Auto Aftermarket Show 2026 can contact Booth Fabricators to request a booth design proposal, discuss stall size, plan product demonstration areas, and receive an estimated booth fabrication cost for the Chennai event.
