

## BOS Center Launches White Label E-Commerce Software in India for B2B & B2C Businesses.

Empowering startups, retailers, and enterprises with smart automation, real-time management, and scalable online selling solutions through advanced White Label E-Commerce Software.

**New Delhi, Delhi May 29, 2026** ([IssueWire.com](https://www.IssueWire.com)) - [BOS Center](#) has officially launched its next-generation **AI-powered E-Commerce Software** designed for startups, SMEs, retailers, wholesalers, and enterprise businesses across India and global markets. The cloud-based platform offers complete e-commerce management solutions, including **B2B & B2C commerce**, multi-vendor marketplace management, inventory tracking, order automation, **CRM, payment gateway** integration, and mobile **commerce** support.

BOS Center E-Commerce Platform helps businesses launch and scale online stores with advanced features such as AI product recommendations, real-time inventory management, automated order processing, SEO-optimized storefronts, and integrated marketing automation tools. The platform also supports **white-label e-commerce solutions**, allowing agencies and resellers to operate under their own brand identity.

Built specifically for Indian businesses while supporting global operations, BOS Center integrates with leading payment gateways, logistics providers, ERP systems, and CRM platforms to deliver a complete **digital commerce ecosystem**. With mobile-first architecture, multi-language support, and enterprise-grade cloud infrastructure, **BOS Center aims to simplify online business operations and help companies grow faster in the competitive digital commerce industry.**

BOS Center also provides 24/7 customer support with dedicated live chat support, helping businesses

receive instant technical support, onboarding guidance, and real-time issue resolution.
