

Carmen Sinata Releases Cinematic West Coast Debut Single “Coastlines” Featuring WhoisKevinKent

A Cinematic Collision of West Coast Hip-Hop, Dream Pop, and Coastal Melancholy Featuring WhoisKevinKent

Los Angeles, California May 29, 2026 (Issuewire.com) - Alternative pop artist **Carmen Sinata** returns with “**Coastlines**,” a genre-blurring new single featuring **WhoisKevinKent**, fusing the hypnotic atmosphere of dream pop, the swagger and rhythm of West Coast hip-hop, and cinematic emotional storytelling into something entirely its own.

Sensual, melancholic, and immersive, *Coastlines* unfolds like a late-night drive down the California coast — waves crashing in the distance at blue hour and the emotional aftermath of love that you had to let go of to avoid drowning.

Built from lush textures, haunting melodies, and vivid imagery, the track draws inspiration from West Coast sonic traditions while pushing beyond conventional genre boundaries. The result is a sound that feels simultaneously nostalgic, modern, intimate, and cinematic — unlike anything currently occupying the alternative pop landscape.

WhoisKevinKent's feature adds a contrasting edge to the song's dreamlike atmosphere, bringing charisma, movement, and personality into Carmen Sinata's emotionally rich sonic world.

"*Coastlines* kinda doesn't even have a set genre I don't think.," says Carmen Sinata. "It kinda just felt cool when we made it like 4 years ago and now we finally released it."

Known for blending poetic lyricism, atmospheric production, and emotionally charged storytelling, Carmen Sinata continues building a distinct artistic identity rooted in vulnerability, surreal glamour, and cinematic world-building. *Coastlines* marks the beginning of a new chapter — with additional singles planned throughout the summer and an upcoming EP poised to expand her evolving sonic universe.

With *Coastlines*, Carmen Sinata isn't simply crossing genres — she's creating a world.

"Coastlines" featuring WhoisKevinKent is available now on all streaming platforms.
