

Conexión-es Launches Free AI-Powered Bilingual Resources for Latino Immigrant Families

Featuring a 24/7 AI assistant, simplified USCIS case tracking, and premium emergency safety features, the community-supported app aims to replace fear with clarity.

San Antonio, Texas May 31, 2026 ([issuewire.com](https://www.issuewire.com)) - For many Latino immigrant families, getting help with their immigration situation means paying for advice they cannot fully read in a language that is not their own. A new bilingual platform, Conexión-es, was built in San Antonio to close that gap, giving families free, around-the-clock guidance and a clearer way to understand where they stand.

At the center of the platform is a 24/7 assistant powered by artificial intelligence that answers questions in Spanish in real time, helping families avoid the misinformation that fills unverified internet searches. Conexión-es also offers a simplified United States Citizenship and Immigration Services (USCIS) case tracker and a crisis-ready tool that helps relatives locate a loved one inside the detention system during an emergency.

The app rounds out its toolkit with a library of more than 500 official forms explained in plain language, a directory of verified immigration legal professionals, and a live feed of trusted policy news. A premium safety feature lets a user broadcast their exact location to family and legal contacts the moment they feel unsafe.

"We developed Conexión-es to ensure that no family has to feel alone, invisible, or lost while searching for a better life," said founder Sergio Beltrán. "Our mission is to turn reliable information into a source of permanent strength, making trustworthy orientation accessible to everyone who needs it, regardless of their background or income."

Conexión-es is sustained by its community rather than by advertising or data sales. The heart of the platform, the AI assistant, case tracker, forms library, and news feed, stays free for everyone. The premium location-alert feature comes with a 14-day free trial, so the educational tools families rely on remain free for good.
