

Crypticraft Expands Blockchain Portfolio with a Complete Crypto Wallet Suite for Web3 Businesses

Crypticraft launches a full-stack crypto wallet suite — MetaMask Clone, Trust Wallet Clone, Web3 & White Label Wallet solutions —helping businesses build, brand, and launch any digital asset wallet with speed, security, and full ownership.

Madurai, Tamil Nadu May 24, 2026 ([IssueWire.com](https://www.IssueWire.com)) - As the global crypto wallet market accelerates toward \$4.8 billion by 2030, businesses across fintech, DeFi, gaming, and e-commerce are actively seeking reliable wallet infrastructure to serve their users. Crypticraft responds to this demand with a comprehensive wallet development portfolio that covers every use case from ready-to-deploy clone scripts to fully custom enterprise-grade platforms all built on audited code, non-custodial architecture, and multi-chain compatibility.

"Whether a business wants to launch a Web3 wallet like MetaMask, a mobile-first wallet like Trust Wallet, a fully branded white label product, or a custom DeFi wallet built from the ground up we have a solution ready," said Ram Mohan MS, Founder & CEO of Crypticraft. "Our complete wallet suite means our clients never have to look anywhere else to enter the digital asset space."

Crypticraft Complete Wallet Solution Suite Includes:

MetaMask Clone Script — A fully customizable, non-custodial Web3 wallet solution supporting 50+ EVM blockchains, built-in dApp browser, Wallet Connect 2.0 integration, token swap aggregator across 20+ DEXs, AI-powered fraud detection, gas fee optimization, and hardware wallet support. Deployable on iOS, Android, and as a Chrome/Firefox browser extension within 2–4 weeks. Ideal for businesses targeting the DeFi and Web3 developer community.

Trust Wallet Clone Script — A mobile-first, multi-asset crypto wallet with support for hundreds of tokens and altcoins, built-in DeFi browser, native NFT gallery, one-tap staking, integrated token swap, and encrypted key storage. Fully optimized for iOS and Android with white-label branding included. Best suited for businesses targeting mainstream mobile crypto users.

Crypto Wallet Development — End-to-end custom wallet development covering custodial, non-custodial, MPC, DeFi, NFT, multicurrency, and AI-integrated wallet types. Supports 10+ blockchain networks including Bitcoin, Ethereum, Solana, BNB Chain, Polygon, and Tron. Includes biometric authentication, hardware wallet integration, KYC/AML compliance, advanced admin dashboard, and cross-platform delivery across web, iOS, and Android. Structured pricing starts from \$4,000 for MVP and \$20,000+ for enterprise-grade platforms.

Web3 Wallet Development — A fully non-custodial DeFi wallet built for the decentralized finance ecosystem, featuring yield farming, liquidity pool access, cross-chain bridge, dApp browser, token swap aggregator, and seamless multi-chain connectivity. Users retain complete ownership of private keys while accessing the full range of Web3 financial services from one secure interface. Built for businesses entering the DeFi and Web3 space with depth and functionality.

White Label Crypto Wallet — A ready-to-launch, fully branded wallet platform delivered in 6–8 weeks with the client's own name, logo, color scheme, and domain. Includes multi-chain support, biometric authentication, built-in token swap, DeFi modules, NFT support, KYC/AML compliance, admin dashboard, cross-platform delivery, and complete source code ownership with no licensing restrictions.

Starting from \$10,000 with no hidden costs. The fastest path to market for startups and growing Web3 businesses.

Shared Across All Wallet Solutions:

Across every product in the wallet suite, Cryptiecraft delivers multi-layer security including AES-256 encryption, biometric authentication, two-factor authentication, anti-phishing protection, MPC key management, and AI-powered transaction monitoring. Every solution ships with full source code ownership, a dedicated project manager, audited smart contracts, and ongoing post-launch technical support with no hidden mid-project costs and development timelines ranging from 2 to 8 weeks depending on scope.

Cryptiecraft has served 65+ clients across 30+ countries and is recognized by GoodFirms, TechReviewer, DesignRush, TechBehemoths, and MobileAppDaily as a top blockchain development company globally.
