

Draftss Launches 7-Day Free Trial for Unlimited Design, Marketing & Development Services for Startups & Agencies

Businesses can now experience graphic design, UI/UX, marketing, development, video editing, and 135+ creative services risk-free at Draftss.

Mumbai, Maharashtra May 21, 2026 (Issuewire.com) - As startups and agencies face increasing pressure to launch products faster and maintain a constant flow of marketing assets, many are turning to subscription-based creative services as a more efficient alternative to hiring in-house teams or managing multiple freelancers.

Draftss, a global design and development subscription company, has announced a 7-day free trial that allows businesses to test its unlimited creative and technical services before committing to a paid plan.

The trial gives companies full access to Draftss's multidisciplinary team, covering more than 135 services including graphic design, branding, UI/UX design, landing pages, SaaS dashboard design, motion graphics, video editing, Webflow development, React development, Shopify development, WordPress websites, SEO, content writing, and outreach support.

Unlike traditional agencies that charge by project or hourly rates, Draftss operates on a flat monthly subscription. Clients can submit unlimited requests, receive unlimited revisions, and prioritize tasks through a dedicated project manager. This model is designed to help businesses maintain predictable costs while increasing creative output.

The free trial was introduced in response to growing demand from startups and digital agencies seeking a lower-risk way to evaluate outsourced creative support.

"Most companies know they need ongoing design and development help, but they are hesitant to

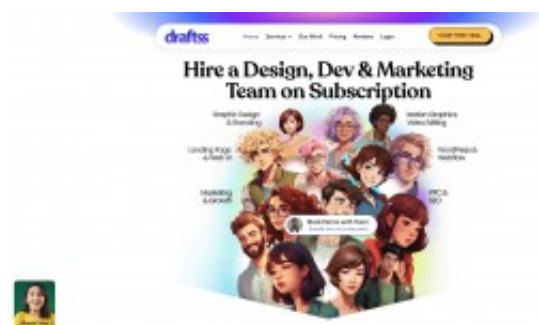

commit without first seeing how the workflow and quality fit their needs," said the Draftss team. "The 7-day free trial gives businesses the opportunity to experience our process and results before making a decision."

Draftss has become a preferred partner for startups, SaaS companies, marketing agencies, and ecommerce brands that require continuous support across design, development, and marketing. The platform integrates with collaboration tools such as Slack, ClickUp, Trello, Jira, Asana, and Notion, enabling teams to work within their existing systems.

Recent enhancements to the service include broader development capabilities, expanded marketing support, and more flexible subscription options tailored to startups, agencies, and enterprise teams.

By offering a free trial, Draftss aims to make it easier for businesses to evaluate a scalable creative solution that can support product launches, website redesigns, ad campaigns, and ongoing growth initiatives.
