London, England May 24, 2026 ([IssueWire.com](https://www.issuewire.com)) - EPOS Direct, a leading provider of EPOS systems for retail and hospitality businesses, has announced a strategic partnership with Teya Payments to deliver a fully integrated EPOS and payment solution designed to make advanced business technology more affordable and accessible across the UK.

The partnership combines EPOS Direct's powerful all-in-one EPOS software with Teya Payments' modern card payment technology, creating a seamless solution for businesses looking to improve operational efficiency while reducing ongoing costs.

As UK businesses continue to face increasing operational expenses and economic pressures, the collaboration introduces a practical alternative to traditional subscription-based EPOS providers. One of the key advantages of the solution is the removal of expensive monthly software subscription fees, allowing businesses to access enterprise-grade EPOS technology without high recurring costs.

The integrated system is designed for retail stores, restaurants, cafés, bars, convenience stores, pharmacies, dry cleaners, and other service-based businesses. The platform enables businesses to

manage sales, inventory, reporting, customer transactions, and payment processing within one unified system.

By integrating Teya Payments into the EPOS Direct platform, businesses benefit from fast, secure, and reliable card payment processing alongside advanced EPOS functionality. The solution is built to simplify daily operations while delivering the flexibility modern businesses require.

“Our partnership with Teya Payments reflects our commitment to making high-quality EPOS systems more accessible to businesses throughout the UK,” said a spokesperson for EPOS Direct. “By removing monthly software subscription fees and combining EPOS technology with modern payment solutions, we are delivering a smarter and more cost-effective solution for growing businesses.”

Unlike many traditional EPOS providers that rely heavily on recurring software charges, EPOS Direct focuses on providing businesses with greater flexibility and long-term value. This approach is especially beneficial for small and medium-sized businesses seeking an affordable EPOS system in the UK without compromising on reliability, scalability, or features.

The partnership also simplifies the onboarding process. Businesses can choose and configure their EPOS and payment solution online, allowing for a faster and more efficient setup experience with minimal disruption to operations.

As demand increases for affordable EPOS systems and integrated payment solutions in the UK, EPOS Direct and Teya Payments are positioning themselves at the forefront of a more flexible and cost-effective approach to business technology.

Businesses interested in learning more about the integrated EPOS and payment solution can explore the platform online at:
