

Harisharan Devgan Leading India's Organic Farming Revolution Through Niche Group

Founder of Niche Group drives sustainable agriculture, and clean energy initiatives to empower farmers and transform India's agricultural future.

Delhi, India May 6, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Harisharan Devgan, an innovative agripreneur and founder of Niche Group, is emerging as a leading force in transforming Indian agriculture through sustainable and organic farming practices. With a strong vision to uplift farmers and promote eco-friendly solutions, Devgan is driving impactful change across multiple sectors including agriculture,

clean energy, and pharmaceutical research.

Coming from a traditional farming background, Harisharan Devgan witnessed the harmful effects of chemical-based farming at an early stage. Determined to create a healthier and more sustainable ecosystem, he began his journey in organic farming in 2000. Despite initial setbacks, his persistence and belief in sustainable agriculture helped him build a successful model that is now inspiring farmers across India.

Under his leadership, Niche Agriculture has been actively promoting organic farming techniques that combine traditional knowledge with modern innovation. His mission is not only to improve crop quality but also to enhance the income and lifestyle of farmers. Devgan has been consistently supporting farming communities by providing financial assistance, modern tools, and educational opportunities for farmers' families.

Expanding beyond agriculture, Harisharan Devgan is also pioneering research in cannabis-based medicines through Niche Agriculture and Pharmaceuticals Limited (NAPL). The organization aims to develop affordable treatments for chronic diseases such as cancer, epilepsy, and Alzheimer's, making advanced healthcare solutions accessible to the common population.

In addition, his vision includes contributing to India's clean energy future. Through initiatives focused on solar power and biofuel production from industrial hemp, he is working towards reducing dependency on non-renewable resources and promoting environmental sustainability.

"Farming is not just a profession, it is a responsibility towards nature and society," says Harisharan Devgan. "My goal is to change the perception of farming in India and empower farmers to become self-reliant and prosperous."

With a legacy of over 80 years in farming and land banking, Harisharan Devgan continues to expand Niche Group into diverse sectors including biotechnology, clean energy, film production, and livestock, positioning himself as a multi-domain innovator committed to nation-building.

About Niche Group

Niche Group is a diversified organization working across agriculture, pharmaceuticals, clean energy, biotechnology, and media. The group is committed to sustainable development, farmer empowerment, and innovation-driven growth, aiming to create long-term value for society and the environment.
