

Hunt Lambert Releases *Saving Miz Liberty*, A Timely Call for Fairness, Hope, and the Future of American Liberty

San Francisco, California Jun 2, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Author Hunt Lambert announces the release of [Saving Miz Liberty: Simple Solutions to the Problems Facing America](https://www.IssueWire.com), a timely and thought-provoking book that examines the challenges facing the United States and offers practical ideas for restoring fairness, hope, and respect for liberty.

Using the Statue of Liberty as a powerful symbol, and protagonist trying to survive, Lambert presents America as a nation in need of serious repair. Rather than offering cosmetic fixes, the book calls for structural solutions that address the deeper issues affecting everyday citizens, including economic pressure, declining trust, political division, and the growing influence of data, technology, and artificial intelligence.

Saving Miz Liberty explores how liberty can be weakened when fairness and hope begin to fade. Through a direct and solution-focused approach, Lambert encourages readers to look beyond partisan conflict and consider reforms that can strengthen the American promise for current and future generations.

The book also reflects Lambert's experience as a global thinker, advisor, entrepreneur, educator, and builder. His work spans business, technology, economic development, and higher education, giving him a broad perspective on how complex systems can be repaired, improved, and made more accessible with simple solutions.

At its heart, *Saving Miz Liberty* is a call to rethink what it takes to keep liberty alive. Lambert writes with urgency, but also with hope, offering readers a vision for an America that can still choose fairness, shared opportunity, and responsible reform using capitalist tools.

Saving Miz Liberty: Simple Solutions to the Problems Facing America is now available on Amazon in Kindle, paperback, hardcover, and Audible formats. Readers can also learn more about the book at [savingmizliberty.com](https://www.savingmizliberty.com).

Hunt Lambert is a Colorado College graduate who completed masters work at MIT in business and computer science. He spent 20 years in industry helping build the global internet and digital wireless communications, and helped start companies in 12 countries that were ultimately valued at more than \$30 billion.

Lambert later spent 20 years in higher education, including teaching MBAs, building an entrepreneurship center, and co-founding CSU-Global at Colorado State University. Then as the dean of the Harvard University Extension School. His career includes building entrepreneurship programs, supporting economic development, expanding online education at affordable prices, and helping make learning more accessible to students in Colorado and around the world.
