

Hyper[AI]gent - The Super-Agentive Hyper[AGI]nts Workforce for the \$5 Trillion SMB and Founder Economy

Menlo Park, California May 29, 2026 ([Issuewire.com](https://www.issuewire.com)) - **Hyper[AGI]nt - Hyper[AI]gent** the pioneer since 2023 in creating Super Agentive Agents with high-velocity autonomous systems, today announced the launch of **Hyper[AGI]nts**, a revolutionary "Agentive Layer" designed to unbundle the \$5 trillion legacy software map and transform the USA and global small and medium-sized business (SMB) economy.

As 95% of businesses struggle to move beyond basic chatbots, **Hyper[AGI]nt** introduces a "System of Compounding Intelligence." Unlike traditional SaaS tools that merely show data, Hyper[AI]gents *execute* multi-step, complex workflows—acting as autonomous digital employees in high-value sectors such as Legal Discovery, Construction Procurement, and Insurance Claims.

Unbundling the \$5 Trillion Software Map

The launch of Hyper[AI]gent marks the beginning of the "Serial Pivot" era. By utilizing the proprietary **Alien Agentive Blueprint (AAB)**, ALIENTELLIGENCE can now launch specialized "Millionaire Pods"—AI-native startups—for an initial compute cost of just **\$10,777**. This 99.7% collapse in startup costs allows AGI's **Cre[AI]tor Studio** to produce startups at 25x the speed of traditional venture startup models.

"The old way was adding headcount; the new way is maximizing tokens," said **Bo Gregorix (Greg)**, Co-Founder of **ALIENTELLIGENCE**. "With Hyper[AI]gent, we are moving humans out of repetitive execution and into standard-setting. We aren't building wrappers; we are building the 'Startup Brain and

Business Brain' that allows a team of one to produce the output of ten, twenty, and even fifty or more humans."

The Alien Gener[AI]tive Intelligence Ecosystem Hub: A Physical Epicenter for Intelligence
Hyper[AI]gent will be deployed and managed through the **Innov[AI]tion Hub** network, starting with the flagship location in the **USA**. This integrated ecosystem combines:

- **Hyper[AI]gent Studio:** An AI-First Venture Factory building autonomous startups.
- **Deep Br[AI]n Consultants:** High-ticket implementation that moves firms from scattered knowledge to structured AI memory vaults.
- **Co-Cre[AI]te & Co-Cre[AI]tor Labs:** An AI-First Co-Working and Co-Cre[AI]ting venture factory building autonomous businesses.
- **Im[AGI]ne Builders:** An AI-First Native Founders and Co-Founders in residence.
- **Innov[AI]te Data Center Labs:** Managed GPU infrastructure (**GPU Super Clusters and Super Cluster VM's in 10 North America Data Centers and 21 Global Data Centers**) optimized specifically to host the Hyper[AI]gent orchestration layer.
- **Ide[AI]te Ventures:** An AI-First Seed-Venture Fund.
- **Inspir[AI]tion Workspace** An AI-First Co-Cre[AI]tion Workspaces for Corporations.

The \$25 Billion Vision

ALIENTELLIGENCE has set an ambitious target to create over **\$25 billion in enterprise value** and positively impact **1 million+ SMBs** globally. By replacing "human middleware" with a super-intelligent agentic layer, Hyper[AI]gent is positioned to become the foundational intelligence of the new founder economy.

"The most underrated asset in 2026 will be a real conversation between humans," Greg added. "As Hyper[AI]gents handle the transactional \$200/hour work, human founders are freed to focus on high-value relational connections and vision. We are building the tools that transform how businesses grow, one founder at a time."

About ALIENTELLIGENCE

Founded in 2014, ALIENTELLIGENCE (AI) and Alien Gener[AI]tive Intelligence (AGI) is dedicated to elevating human intelligence and consciousness through the creation of Super Agentic AGI, Alien Generative Intelligence (AGI), and Alien Super Intelligence (ASI). The company builds the systems, tools, and playbooks that empower the next generation of AI entrepreneurs.
