

Kling 3.5 Launches Free AI Video Generator for Text-to-Video and Image-to-Video Creation

Kling 3.5 launches a free AI video generation platform that turns text and images into high-quality video clips, serving content creators and marketers worldwide.

Amityville, New York May 14, 2026 ([IssueWire.com](https://www.issuewire.com)) - [Kling 3.5](https://www.kling35.org) (<https://www.kling35.org>) today announced the launch of its AI-powered video generation platform that transforms text descriptions and reference images into high-quality video clips directly in the browser. The platform is now available with flexible pricing plans starting at \$9.99 per month.

[Kling3.5](https://www.kling35.org) addresses the growing demand for accessible video creation tools by offering a streamlined three-step workflow. Users begin by writing a text prompt or uploading a reference image, then direct the camera movement and visual style, and finally preview and select the best generated video. The entire process takes minutes and requires no video editing experience. <https://www.kling35.org>

The platform supports two primary generation modes. Text to Video converts written descriptions into full motion clips with coherent scenes, while Image to Video animates still images while preserving the original visual composition. Users can guide specific camera movements including push-ins, pans, tracking shots, and close-ups through natural language prompts. <https://www.kling3-5.org>

[Kling 3.5 AI](#) offers extensive format flexibility with support for multiple aspect ratios including 16:9, 9:16, 4:3, 3:4, 21:9, and 1:1. Users can generate videos at both 720p and 1080p Full HD quality, with duration options of 5 or 10 seconds. The platform also features a built-in prompt assist tool that helps craft effective descriptions with support for up to 800 characters, making it easier for beginners to achieve high-quality results.

Kling 3.5 The platform is designed for marketers testing launch angles and ad concepts, content creators producing social media posts and short-form video, agencies creating client pitch visuals, and product teams turning static campaign assets into motion content. Users can iterate quickly by generating multiple variations of a concept and comparing results side by side before selecting the final output.

Kling 3.5 operates entirely in the browser with no application download required, functioning on both desktop and mobile devices. A free tier provides trial credits for new users, with Basic (\$9.99/mo), Professional (\$23.90/mo), and Enterprise (\$63.90/mo) plans for higher-volume needs. All paid plans include commercial use license, unlimited downloads, no watermark, priority processing, and dedicated support. An annual billing option offers discounted rates compared to monthly plans.
