

Lithosphere Expands Pre-TGE Ecosystem Access Through LITHO Deals Platform

The AI-powered blockchain platform broadens ecosystem participation ahead of its planned TGE through expanded infrastructure access and strategic engagement initiatives.

Singapore, Singapore May 20, 2026 ([IssueWire.com](https://www.issuewire.com)) - [Lithosphere](https://www.lithosphere.network), an AI-driven blockchain infrastructure platform, has expanded pre-TGE ecosystem access through its LITHO Deals platform, strengthening participation opportunities across its growing decentralized infrastructure ecosystem. The initiative is designed to support broader engagement as demand increases for AI-native blockchain systems and autonomous coordination frameworks.

The LITHO Deals platform provides structured access to ecosystem participation ahead of the planned LITHO Token Generation Event (TGE). The expansion aligns with Lithosphere's broader infrastructure strategy focused on enabling scalable interaction between decentralized applications, autonomous agents, and interoperable blockchain systems.

Lithosphere's infrastructure supports AI-driven execution, validator coordination, and decentralized operational frameworks designed for emerging Web4 ecosystems. By expanding access through the LITHO Deals platform, the project aims to strengthen ecosystem development around intelligent automation and onchain coordination technologies.

[J. King Kasr](#), Chief Scientist at KaJ Labs, noted that expanding ecosystem participation ahead of the planned TGE reflects increasing interest in decentralized infrastructure built for autonomous systems and intelligent execution. According to Kasr, scalable participation models are becoming essential as

blockchain ecosystems evolve toward AI-native Web4 environments.

The development aligns with the broader transition from Web3 infrastructure toward Web4 systems architecture, where autonomous coordination, interoperable execution frameworks, and intelligent decentralized systems support next-generation digital ecosystems.

About

Lithosphere is an AI-powered blockchain platform designed to support scalable decentralized applications through intelligent automation, advanced validator infrastructure, and interoperable blockchain technologies.
