

## Lux Electrical Wiltshire Observes Increased Demand for Electrical Upgrades in Older UK Homes

**Melksham, Wiltshire May 21, 2026 ([Issuewire.com](https://www.issuewire.com))** - Lux Electrical Wiltshire has reported a noticeable rise in demand for electrical upgrades across older UK properties, particularly in historic areas such as Bath. Homeowners are now putting safety and energy efficiency at the top of their to-do lists. They want their homes to handle modern life without the risks of old tech.

Recent data shows that electrical faults are still a top cause of house fires in the UK. Thousands of these fires happen every year. Many start because of old wiring, crowded circuits, or ancient fuse boards. Lux Electrical Wiltshire says that local homeowners are waking up to these dangers. They are calling in the pros to make sure their houses meet today's safety rules.

One area seeing a huge jump in interest is [Kitchen and bathroom electrical services in Bath](#). These two rooms use more power than almost anywhere else in the house. Between modern ovens, high-end power showers, and new lighting, old wiring can easily get overwhelmed. Updating these spaces is no longer just about looks—it's about making sure the room can handle the load safely.

Beyond safety, these upgrades are a smart financial move. Local estate agents note that homes with certified, modern electrics stand out to buyers. In a busy market like Bath or Wiltshire, a safe home often sells faster and for a better price.

Lux Electrical Wiltshire is helping by offering custom plans for full rewires, new fuse boards, and expert kitchen and bathroom work. They urge everyone to get regular checks and always use a certified pro.
