

Mapa Health Expands Multilingual Medical Tourism Services for International Patients

Mapa Health connects international patients with trusted clinics in Istanbul for eye laser surgery, dental treatments, hair transplant and plastic surgery services.

Umraniye, Istanbul May 15, 2026 ([Issuewire.com](https://www.issuewire.com)) - Mapa Health, an international medical tourism agency based in Istanbul, continues to expand its multilingual healthcare support services for patients traveling to Turkey for affordable and high-quality medical treatments.

The company works with experienced clinics and specialist doctors in Istanbul to help international patients access procedures including LASIK eye surgery, dental treatments, hair transplant, plastic surgery and obesity surgery.

Mapa Health provides support throughout the treatment journey including online consultation, treatment planning, airport transfer, hotel accommodation and multilingual patient assistance.

Turkey has become one of the world's leading destinations for medical tourism due to its experienced doctors, modern hospitals and cost-effective treatments. Mapa Health aims to simplify the process for patients looking for safe and reliable treatment options abroad.

Patients from Europe, the United Kingdom, Canada and the Middle East continue to choose Istanbul for medical procedures because of the combination of quality healthcare and affordable pricing.
