

## **Medical Appraisals UK Reaches Major Milestone With Over 700 Five-Star Reviews and 3,000+ Completed Doctor Appraisals**

Leading independent medical appraisal provider reaffirms its position as the most trusted GMC-compliant appraisal service for doctors across the United Kingdom and internationally.

**London, England May 25, 2026** ([Issuewire.com](http://Issuewire.com)) - Medical Appraisals UK, one of the country's foremost providers of independent doctor appraisals and medical revalidation support, has announced a

significant organisational milestone — surpassing 700 verified five-star Google reviews and completing more than 3,000 GMC-compliant appraisals for doctors across the United Kingdom and internationally. This achievement marks a defining moment for the organisation, which has steadily built its reputation on clinical rigour, personalised guidance, and an unwavering commitment to doctor wellbeing since its founding in 2016.

The milestone reflects a decade of consistent service delivery to NHS consultants, locum doctors, private practitioners, academics, and overseas-qualified physicians navigating the United Kingdom's medical revalidation requirements. Medical Appraisals UK has positioned itself as a trusted partner for doctors at every stage of their careers, providing not only appraisal facilitation but also pre-appraisal coaching, revalidation planning, and designated body connection support.

## **A Decade of Trust Built on Verified Outcomes**

Founded by Professor Rehan Kazi — a highly experienced head and neck surgeon, trained medical appraiser, and Responsible Officer — Medical Appraisals UK was established with a clear mandate: to make the appraisal process transparent, accessible, and stress-free for doctors who often find the requirements burdensome or unclear.

Over the past ten years, the organisation has completed appraisals for NHS Trusts, locum agencies, private clinics, and internationally trained doctors, all in full compliance with General Medical Council (GMC) and NHS England standards. Each appraisal is conducted by Professor Kazi personally, ensuring consistency, quality, and the highest standard of professional engagement.

"Reaching 3,000 appraisals and 700 five-star reviews is not simply a numerical achievement — it is a reflection of the trust that doctors across the United Kingdom and beyond have placed in our service," said Professor Rehan Kazi, Lead Medical Appraiser and Founder of Medical Appraisals UK. "Every appraisal we conduct is approached with the same level of care and attention. Our priority has always been to support doctors through what can often be an anxiety-inducing process and to help them see their appraisal as an opportunity for genuine professional growth."

## **Addressing a Critical Gap in Independent Appraisal Services**

Medical Appraisals UK serves a broad and diverse physician population, including locum doctors — a group that has historically faced considerable difficulty securing timely, GMC-compliant appraisals due to the absence of an affiliated NHS employer or designated body. The organisation's model, which offers flexible remote appraisals conducted via video conference, has made it particularly valuable to this segment of the medical workforce.

In addition to locum appraisals, Medical Appraisals UK provides services for overseas-trained doctors seeking to meet UK revalidation requirements, doctors returning to practice, consultants in the independent sector, and those working in academic or non-standard clinical roles. The organisation's breadth of service and demonstrated expertise have made it a go-to resource across specialities and career pathways.

Medical Appraisals UK's appraisal service starts from £399, with transparent pricing and no hidden fees — a deliberate approach that stands in contrast to what Professor Kazi describes as an often unnecessarily expensive and administratively burdensome landscape.

## **Commitment to Standards and Continuous Improvement**

Professor Kazi is actively involved with national bodies including the GMC Reference Group and the Locum Responsible Officer Network, ensuring that Medical Appraisals UK remains at the forefront of evolving guidance and best practice. The organisation's appraisals are compatible with all major appraisal portfolio platforms, including Fourteenfish, Clarity, and I2p.co.uk.

The organisation also maintains an extensive educational resource library through its website, YouTube channel, and Watch and Learn series — providing doctors with free guidance on significant events, complaints and compliments documentation, CPD requirements, and the broader revalidation process.

Doctors seeking expedited appraisals can receive an appointment within 24 to 48 hours, provided their appraisal portfolio is complete — a feature that has proven particularly valuable to those approaching revalidation deadlines.

## **Looking Ahead**

With its milestone achieved, Medical Appraisals UK has expressed its intention to continue expanding its reach and refining its service model to support the evolving needs of the UK medical workforce. The organisation has noted particular focus on growing its support for overseas and internationally mobile doctors, as well as further developing its career coaching and Responsible Officer services.

Doctors wishing to learn more about Medical Appraisals UK, book an advisory call, or schedule an appraisal can visit the organisation's website or contact Professor Kazi directly.

## **About Medical Appraisals UK**

Medical Appraisals UK, established in 2016 and headquartered in Rickmansworth, United Kingdom, is one of the country's leading providers of independent, GMC-compliant medical appraisals and revalidation support. Led by Professor Rehan Kazi — a trained medical appraiser, head and neck surgeon, and Responsible Officer — the organisation has completed over 3,000 appraisals and received more than 700 five-star Google reviews. Services include annual doctor appraisals, locum appraisals, designated body connection, Responsible Officer services, career coaching, observership programmes, and medico-legal support. Appraisals are available remotely and face-to-face across the United Kingdom and internationally.
