Bengaluru, Karnataka May 11, 2026 (IssueWire.com) - nayft, a next-generation Web3 platform focused on simplifying digital asset management, has officially announced its public launch date for **June 7, 2026**. Designed for crypto users, traders, creators, and Web3 communities, nayft brings together portfolio tracking, exchange connectivity, wallet integration, and curated crypto insights into

one seamless ecosystem.

As the crypto industry continues to grow rapidly, users often struggle with fragmented tools, scattered information, and complex portfolio management experiences. nayft aims to solve this problem by offering a clean and user-friendly platform where users can connect exchanges and wallets, monitor assets in real time, and stay updated with relevant market trends - all in one place.

The platform supports exchange integrations and wallet connectivity, allowing users to manage both centralized and on-chain holdings without switching between multiple applications. Alongside portfolio management, nayft is building a curated information layer that helps users discover important crypto updates, narratives, and market movements more efficiently.

“Web3 is growing fast, but the user experience is still fragmented for many people,” said the nayft team. “We’re building nayft to make crypto tracking and digital ownership simpler, smarter, and more accessible for everyone.”

The launch announcement comes as global interest in crypto, ETFs, tokenized assets, and blockchain-based ecosystems continues to increase. With users demanding more organized tools and simplified experiences, platforms focused on usability and accessibility are becoming increasingly important in the Web3 ecosystem.

nayft’s launch campaign will include early access opportunities, community onboarding, and wishlist registrations ahead of the official release. The company encourages users, creators, and Web3 enthusiasts to join the wishlist and become early adopters of the platform before launch day.

Key Features of n@yft

- Crypto portfolio tracking
- Exchange integrations
- Wallet connectivity
- Curated crypto news and insights
- Unified digital asset management
- Community-focused Web2.5 experience

The official launch is scheduled for **June 7, 2026**.

Users can learn more and join the wishlist by visiting the official nayft website and social platforms.

About nayft

n@yft is a Web3 platform designed to help users track crypto portfolios, connect wallets and exchanges, discover curated market insights, and simplify digital asset management through a unified and user-friendly ecosystem.
