

NJTPL Marks 20+ Years as India's Trusted Jewellery Equipment and Consultancy Partner

NJTPL, a Mumbai-based jewellery equipment supplier and consultancy firm, reflects on 20+ years of empowering India's gem and jewellery industry with world-class technology, premium global brands, and end-to-end manufacturing support.

Mumbai, Maharashtra May 27, 2026 ([IssueWire.com](https://www.IssueWire.com)) - N Jewellery Techniques Pvt. Ltd. (NJTPL), one of India's most trusted suppliers of jewellery manufacturing equipment and consultancy services, today reaffirmed its position as a premier partner for the country's gem and jewellery industry. Since its

establishment in 2002, the company has grown to serve over 500 clients across India, offering a comprehensive range of imported equipment, consumables, and specialised advisory services tailored to jewellery manufacturers of all scales.

Headquartered in Mumbai — the heart of India's jewellery trade — NJTPL operates as an authorised importer and distributor for some of the world's most respected jewellery equipment manufacturers, including Sisma, Ultraflex, and Heraeus. The company's portfolio spans the full spectrum of jewellery production needs, from casting machines and laser welding systems to finishing equipment and precision tools, enabling manufacturers to meet the highest standards of quality and efficiency.

A Complete Partner from Inception to Completion

What sets NJTPL apart in the Indian market is its holistic approach to client engagement. Unlike conventional equipment suppliers, the company offers complete consultancy services that begin well before production commences. NJTPL assists clients in planning factory layouts, selecting appropriate production processes, implementing quality control systems, and conducting worker training programmes — ensuring that every jewellery manufacturing unit is set up correctly from the very first stage.

The company's guiding philosophy, "Start Right," reflects a core belief that the foundation of any successful manufacturing operation lies in the decisions made at inception. With over 25 years of hands-on industry experience, NJTPL has helped numerous businesses avoid the common pitfalls associated with poor equipment selection, inadequate planning, and insufficient technical training.

Comprehensive After-Market Support

Recognising that equipment reliability is critical to uninterrupted production, NJTPL maintains a fully trained service department backed by a well-stocked inventory of consumables and spare parts. The company provides round-the-clock technical support and maintenance services, ensuring that clients across India can access timely assistance whenever it is required. This commitment to after-market care has been a key differentiator in building long-term relationships with manufacturers ranging from small artisanal studios to large-scale jewellery factories.

Leadership Commentary

"Over the past two decades, the Indian jewellery manufacturing industry has undergone a significant transformation in terms of technology adoption, production standards, and global competitiveness. At NJTPL, our role has always been to ensure that our clients have access to the best available equipment and the expertise to use it effectively. We take pride in being a partner that our clients can rely upon not just at the time of purchase, but throughout the entire lifecycle of their operations."

— Director, N Jewellery Techniques Pvt. Ltd.

Serving a Diverse Client Base Across India

NJTPL's clientele includes manufacturers of plain gold jewellery, diamond-studded jewellery, high-end imitation jewellery, and a wide variety of other jewellery categories. The company's nationwide reach, combined with its deep product knowledge and vendor relationships, has enabled it to provide solutions that are both technically appropriate and commercially competitive. For businesses facing challenges in

existing production setups, NJTPL also offers troubleshooting and product improvement consultancy to help manufacturers optimise their current operations.

With India's gem and jewellery sector continuing to grow as one of the country's most significant export industries, NJTPL remains committed to equipping the industry's manufacturers with the tools, technology, and knowledge required to compete on a global stage.
