

PDF Checkpoint 2: Now Apple-Silicon Native with PDF Image Extraction

Zevrix Solutions announces PDF Checkpoint 2, a major upgrade to the company's PDF preflight and conversion solution for macOS. The new adds Apple Silicon native support and introduces automatic PDF image extraction.

Toronto, Ontario May 31, 2026 (IssueWire.com) - Zevrix Solutions today announces PDF Checkpoint 2, a major upgrade to the company's PDF preflight and conversion automation tool for macOS. Remarkably fast, PDF Checkpoint automatically exports as images, preflights, splits, and optimizes batches of Adobe PDF files. PDF Checkpoint is an ideal program for users who need an affordable, fast, and easy-to-use automator to check PDF files for errors and convert them to the desired file format and color space.

The new version adds native support for Apple Silicon processors, ensuring long-term compatibility with future macOS releases. In addition, the update introduces automated PDF image extraction, allowing users to save extracted images in their preferred format, resolution, and color space.

PDF Checkpoint is designed to automate and simplify PDF workflows of ad agencies, publishers, prepress houses, and graphic designers:

-[Batch PDF preflight and conversion](#).

-Check PDF image resolution, color, and preview.

-Convert PDF color mode using ICC profiles.

-Flag undesired fonts.

-[Extract PDF images](#) with user-defined properties.

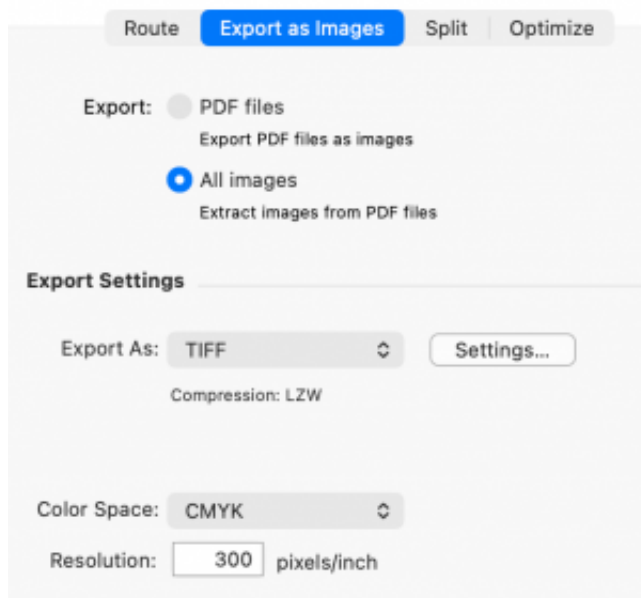

-Split files into single-page PDFs.

-[Export PDF as TIFF, PNG, or JPEG](#) images with specific resolution, color, and page scale.

For example, users can preflight a folder of PDF files and convert them to TIFF images at 300 dpi while scaling each page by 50%. Or optimize documents for web and mobile devices while reducing file size dramatically by downsampling images to the screen resolution.

Pricing and availability:

PDF Checkpoint can be purchased on the Mac App Store and Zevrix website for US\$39.95, as well as from authorized resellers. The upgrade is \$20 for the users of PDF Checkpoint 1. Trial is also available for download. PDF Checkpoint requires macOS 10.9-26.x.
