

# Pitchroom Launches EU-Hosted All-in-One Fundraising Platform for Startups - Combining CRM, Dataroom & Outreach Tools

Founders in active fundraising rounds lose weeks to admin across disconnected tools. Pitchroom consolidates the entire investment pipeline from data room, investor CRM, outreach and pitch sharing, into one EU-hosted platform.

| Name  | Size / Contents    | Date |
|---|--------------------|------|
| Company legal documents and ownership                       | 6 Folders          | —    |
| Contractual obligations                                     | 16 Folders         | —    |
| Employees and management                                    | 4 Folders          | —    |
| Financial matters   | 4 Folders          | —    |
| Financing, loans and collateral                             | 3 Folders          | —    |
| General administrative matters                              | 2 Folders, 4 files | —    |
| Insurance   | 3 Folders          | —    |
| Intellectual property rights                                | 4 Folders          | —    |
| IT and systems  | 2 Folders          | —    |
| Properties and leases                                       | 3 Folders          | —    |
| Regulatory matters (incl. work environment and environment) | 2 Folders          | —    |
| Tax   | 5 Folders          | —    |
| Transactions between related parties                        | 1 Folder           | —    |

**Copenhagen, Denmark May 17, 2026 ([IssueWire.com](https://www.issuewire.com))** - Pitchroom Launches EU-Hosted All-in-One Fundraising Platform for Startups; Combining CRM, Dataroom & Outreach Tools

**Pitchroom**, a Copenhagen-based SaaS fundraising platform, has officially relaunched after 18 months, offering startups and scaleups a single, secure environment to manage their entire investment pipeline, replacing the fragmented stack of CRM, virtual data room, outreach, and presentation tools founders typically rely on.

## One Platform Replaces Four Tools

The average founding team in active fundraising juggles four or more separate services to manage investor outreach, track pipeline, share pitch decks, and maintain a secure data room. Pitchroom

consolidates all of these into a single EU-hosted platform, eliminating redundant subscriptions and, critically keeping sensitive company data in one secure vault rather than spread across multiple third-party systems.

The platform includes:

- **Virtual data room** with custom domain, dynamic watermarking and full audit trails
- **Investor DB & CRM** to find investors and track pipeline and manage relationships
- **Pitch deck sharing** with granular access controls
- **Outreach sequencing** to plan and personalise investor flows ahead of time

### **Built for the EU, Hosted in the EU**

Pitchroom's infrastructure is fully EU-hosted, with company headquarters in Denmark. For European startups navigating GDPR requirements and increasing scrutiny around data sovereignty, this removes a compliance burden that comes with US-based alternatives. Sensitive cap table documents, term sheets, and financial projections never leave European jurisdiction.

### **Fundraising Is a Second Full-Time Job, Pitchroom Aims to Change That**

Research consistently shows that founders in active fundraising rounds spend a disproportionate share of their working hours on process coordination rather than investor conversations. Scheduling, document versioning, follow-up sequencing, and access management collectively consume weeks of founder time per round.

"Fundraising software has been built around investors, not founders," said Lasse Hedegaard, CEO of Pitchroom. "We built Pitchroom from the ground up around the startup's workflow so founders can spend their time on conversations, not logistics."

Pitchroom allows teams to prepare the entire outreach sequence before a round launches; investor lists, personalised materials, and follow-up flows, enabling a more structured and less reactive process.

### **Pricing & Availability**

Pitchroom offers a free tier for founders wanting to test the platform, with paid plans starting at **\*\*€25/month\*\*** for the Startup plan, available now.

### **About Pitchroom**

Founded in 2017 by serial entrepreneurs, Pitchroom has provided virtual data rooms and fundraising tools to thousands of companies across Europe and North America. The platform serves startups and scaleups at Seed through Series B, covering the full fundraising lifecycle from initial outreach to closing. Headquartered in Copenhagen, Denmark, Pitchroom is GDPR-compliant and fully EU-hosted.
