DESIGNED FOR EXPERIENCED MEDICAL CODERS
READY TO ADVANCE BEYOND ROUTINE CODING

CMCC® – CERTIFIED MEDICAL CODING CONSULTANT
By PMBAUSA LLC & MEDESUN PRIME

Denver, Colorado May 18, 2026 (IssueWire.com) - For more than two decades, the United States medical coding profession has operated with a credentialing gap that no one formally addressed.

Experienced coders professionals with 7, 10, sometimes 15 years of frontline expertise have been auditing physicians, leading compliance programs, correcting clinical documentation, and driving millions of dollars in revenue cycle outcomes every single day.

And yet, the credential on their wall was identical to the one issued to a professional who completed a 6 month training program.

PMBAUSA LLC and MEDESUN PRIME have built the credential that changes this reality.

Introducing CMCC® Certified Medical Coding Consultant

The first consultant level professional credential in the history of United States medical coding purpose engineered for experienced professionals who have long outgrown routine code assignment and operate daily at the level of a clinical, compliance, and revenue cycle consultant.

WHAT CMCC® REPRESENTS A NEW PROFESSIONAL STANDARD

The CMCC® credential does not exist to certify that a professional can assign a CPT code or sequence an ICD 10 CM diagnosis. That work belongs to entry level credentials.

CMCC® certifies something far more significant.

It certifies that a professional can think at consultant level reviewing complex medical records with critical analytical precision, identifying documentation deficiencies that carry compliance and financial risk, integrating coding knowledge with auditing standards, CDI principles, and regulatory compliance frameworks, and communicating findings with the authority of a subject matter expert.

CMCC® is the first credential in the USA to formally recognize this expertise.

It draws a permanent professional line between a coder who processes claims and a Certified Medical Coding Consultant who drives organizational outcomes across the entire healthcare revenue cycle.

THE CMCC® BETA EXAM APPLICATIONS ARE NOW INVITED

PMBAUSA LLC and MEDESUN PRIME are officially opening Beta Exam Applications for the inaugural cohort of CMCC® certified professionals.

Beta candidates occupy a unique position in the history of this credential. As founding cohort members, their performance directly shapes the competency benchmarks, difficulty calibration, and professional standards that will define CMCC® certification across the United States for years to come.

The Beta Exam carries an assessed value of 600 dollars reflecting the depth, rigor, and consultant level complexity of the assessment framework.

Exclusive Beta cohort access is available for a limited window. Applications are invited immediately.

CMCC® BETA EXAM WHAT CANDIDATES ARE ASSESSED ON

REAL MEDICAL RECORD ANALYSIS

Candidates analyze actual clinical documentation under conditions of complexity and ambiguity the precise environment that defines real consulting engagements. There are no simplified textbook scenarios.

CONSULTANT LEVEL CRITICAL THINKING

Beyond identifying a code, candidates must evaluate documentation risk, compliance exposure, and clinical integrity demonstrating judgment that distinguishes a consultant from a technician.

CODING AUDITING CDI COMPLIANCE INTEGRATED ASSESSMENT

The CMCC® does not evaluate these disciplines in isolation. A Medical Coding Consultant operates across all four domains simultaneously, and the examination reflects this integrated professional reality.

AI NLP AND HEALTHCARE TECHNOLOGY AWARENESS

Artificial Intelligence and Natural Language Processing are no longer emerging technologies in healthcare they are operational realities inside coding departments today. CMCC® candidates demonstrate awareness of these technologies, their applications, and their compliance implications.

PRACTICAL ANALYTICAL SKILLS ASSESSMENT

Candidates produce structured analytical deliverables mirroring the professional outputs of a real consulting engagement. This is not a multiple choice exam. It never was designed to be.

CMCC® BETA EXAM ELIGIBILITY REQUIREMENTS

The CMCC® credential is designed exclusively for experienced professionals. Eligibility requires

ACTIVE CERTIFICATION IN ONE OF THE FOLLOWING

CPC/CRC/CMC/CCS/FIMC

MINIMUM PROFESSIONAL EXPERIENCE

5 Years of Medical Coding, Auditing, CDI, or Revenue Cycle Management experience

These requirements are non negotiable. CMCC® was built for professionals the industry already trusts and has never formally recognized.

WHY CMCC® WHY NOW?

The United States healthcare industry is undergoing accelerated transformation.

Artificial Intelligence is automating routine code assignment at scale. Payers are deploying machine learning algorithms for claims adjudication. Health systems are demanding professionals who can navigate compliance risk, lead clinical documentation integrity initiatives, and provide consultant level guidance across the revenue cycle.

The demand for Certified Medical Coding Consultants already exists inside every major health system,

physician group, and revenue cycle organization in the country.

CMCC® gives that demand a credential and gives experienced professionals the recognition they have earned.

ABOUT PMBAUSA LLC AND MEDESUN PRIME

PMBAUSA LLC is a United States registered organization dedicated to advancing professional standards in medical coding, billing, and revenue cycle management through proprietary credentialing, education, and workforce development programs.

MEDESUN PRIME is a globally recognized leader in healthcare coding education, credentialing, and clinical documentation integrity training, with operations spanning India and the United States.

Together, PMBAUSA LLC and MEDESUN PRIME represent over two decades of medical coding expertise, curriculum innovation, and professional standard setting across both markets.
