

Professional CERT-In Empanelled Security Vendor in India

Chennai, Tamil Nadu May 20, 2026 (Issuewire.com) - Cybersecurity has become an important part of business operations for startups, enterprises, fintech companies, SaaS providers, healthcare organizations, and government vendors. This is why organizations look for a professional **CERT-In empanelled security vendor like Peneto Labs** that can provide structured security assessments, clear reporting, and reliable remediation guidance.

About Peneto Labs, an Expert CERT-In empanelled cybersecurity vendor

Peneto Labs is a [CERT-In empanelled cybersecurity company](#) focused on penetration testing, vulnerability assessments, and security auditing services. Founded in 2017, the company has recently expanded its operations to the UAE while serving organizations across India and global markets like the USA.

With 2000+ security audits completed every year and experience across 10+ industries, Peneto Labs works with fintech companies, banks, SaaS platforms, enterprises, startups, healthcare providers, and government-related organizations.

Why Choose Peneto Labs for CERT-In Cybersecurity Services?

At Peneto Labs, we offer professional VAPT assessments to help businesses identify security risks before attackers misuse them. Top businesses choose us for below mentioned reasons:

- **Manual Penetration Testing Approach**

At Peneto Labs, we do not depend only on automated scanning tools. Our cybersecurity team combines automated assessments with manual penetration testing to identify vulnerabilities that scanners may overlook.

This includes testing for insecure APIs, authentication flaws, business logic issues, cloud misconfigurations, and privilege escalation risks. Our assessments simulate attacker behavior to identify how vulnerabilities may impact business systems.

- **Experienced Cybersecurity Professionals**

Our team holds globally recognized certifications including OSCP, OSCE, GPEN, GXPN, GWAPT, GCIH, CEH, CREST, and more. These certifications represent advanced penetration testing and cybersecurity expertise.

We follow international assessment methodologies such as OWASP, PTES, NIST, and OSSTMM while performing VAPT and security assessments.

- **Security Services We Offer**

At Peneto Labs, we provide multiple cybersecurity assessment services, including:

- Web Application VAPT
- Mobile Application Security Testing
- API Security Testing
- Cloud Security Assessments
- Network Penetration Testing
- Red Team Assessments
- Secure Code Review
- IoT and SCADA Security Testing
- Compliance Security Audits

Our assessments are designed for both technical security validation and compliance readiness.

- **Clear Reporting and Compliance Support**

One of the biggest challenges businesses face during security audits is unclear reporting. At Peneto Labs, we provide structured reports with technical findings, risk classification, proof-of-concept evidence, and remediation guidance.

Our reports are prepared for both technical teams and management stakeholders, making it easier to understand risks and remediation priorities. We also provide free retesting support after fixes and help organizations prepare audit-ready documentation.

- **Industries We Serve**

We support organizations across multiple sectors, including:

- Banking and fintech
- Healthcare and health-tech
- SaaS and technology companies
- E-commerce platforms
- Government and PSU projects
- MSMEs and startups
- Manufacturing and enterprise sectors

Our experience across different industries helps us understand technology risks, compliance requirements, and infrastructure challenges more effectively.

Conclusion

Choosing a professional CERT-In empanelled security vendor like Peneto Labs is important for businesses handling sensitive data, payment systems, cloud infrastructure, and enterprise applications.

At Peneto Labs, we focus on manual penetration testing, compliance-focused assessments, transparent communication, and audit-ready reporting to help businesses approach cybersecurity in a more structured and professional manner.
