

## SmartTech Launches Winnipeg's Most Comprehensive Energy-Efficient Window Upgrade Program for 2026

Manitoba's trusted window company launches its biggest-ever upgrade program - Energy Star triple-pane windows, same-day consultations, and financing from \$49/month - helping Winnipeg homeowners cut heating costs before winter hits.

**SmartTech**  
Windows & Doors

**Winnipeg, Manitoba May 24, 2026** ([Issuewire.com](https://www.Issuewire.com)) - SmartTech Windows and Doors Winnipeg, a family-owned home improvement company with 33 years of residential installation experience in Manitoba, today announced the launch of its 2026 Energy-Efficient Window Upgrade Program. The

program is the most complete of its kind offered by a single window contractor in the greater Winnipeg area, combining Energy Star-certified triple-pane windows, same-day free consultations, flexible financing from \$49 per month, and post-installation energy performance support under one roof -- backed by SmartTech's lifetime warranty.

## Why 2026 Is the Year Winnipeg Homeowners Cannot Afford to Wait

Winnipeg winters are not getting gentler. The city regularly records some of the coldest urban temperatures in Canada, with wind chill values that push effective temperatures well below -40 degrees Celsius. For homeowners still relying on single-pane or older double-pane windows, every cold month is a direct hit to the household budget.

Manitoba Hydro has reported consistent increases in residential energy consumption during winter heating season. A significant portion of that heat loss occurs through outdated windows and poorly sealed door frames. SmartTech's 2026 program was built specifically to address that problem at scale, across every Winnipeg neighbourhood, with products and pricing that make the upgrade decision straightforward.

The program launches ahead of Winnipeg's fall and winter heating season, giving homeowners a clear window of time -- no pun intended -- to upgrade before the cold sets in. SmartTech's installation teams are available across River Heights, St. Vital, Transcona, Charleswood, St. James, Wolseley, Elmwood, and all surrounding Winnipeg communities.

## What the 2026 Program Includes

SmartTech's 2026 Energy-Efficient Window Upgrade Program covers the full scope of what Winnipeg homeowners need, from first assessment through to post-installation follow-up. The program components are as follows.

- **Free same-day in-home consultation:** A licensed SmartTech technician visits the property, assesses existing windows, identifies heat loss points, and provides a written quote before leaving.
- **Energy Star-certified triple-pane windows:** Featuring argon gas fill between panes, low-E glass coatings, thermally broken frames, and airtight seal technology rated for Manitoba's full climate range.
- **Full window type selection:** Casement windows, awning windows, double-hung windows, single-hung windows, double slider windows, end vent slider windows, picture windows, bow windows, fixed casement windows, and vinyl windows are all available under the program.
- **[Professional window installation](#) by certified technicians:** Every installation is completed by factory-trained, licensed, and insured SmartTech professionals. Standard residential projects are completed within one to two days.
- **Flexible financing from \$49 per month:** Zero-percent interest options are available on approved credit, with deferred payment windows of up to 12 months.
- **Lifetime warranty coverage:** All products and workmanship are backed by SmartTech's lifetime warranty, with post-installation support included.

## Program Pricing Reference for Winnipeg Homeowners

SmartTech publishes transparent pricing ranges so homeowners can plan with confidence. The following reference covers common window types and installation locations across Winnipeg residential

properties.

## **Window Type**

### **Average Price Range (CAD)**

Bay / Bow Window ----- C\$2,300 -- C\$5,000

Casement Window ----- C\$350 -- C\$900

Awning Window ----- C\$400 -- C\$1,000

Sliding Window ----- C\$300 -- C\$800

Single Hung Window ----- C\$300 -- C\$900

## **Window Location in Home**

### **Average Price Range (CAD)**

Kitchen Window ----- C\$400 -- C\$850

Living Room Window ----- C\$1,100 -- C\$2,500

Bedroom Window ----- C\$500 -- C\$1,200

Basement Window ----- C\$350 -- C\$650

Basement Egress Window ----- C\$2,000 -- C\$3,800

## **The Science Behind the Savings: What Triple-Pane Actually Does**

A lot of window companies throw the phrase "energy efficient" around without explaining what it means for a Winnipeg household. SmartTech thinks homeowners deserve a straight answer.

Triple-pane windows work through three mechanisms working together. First, three layers of glass with argon gas fills between them create a thermal buffer that single or double-pane products cannot replicate. Second, low-E glass coatings reflect infrared heat back into the room during winter and block solar heat gain during summer. Third, thermally broken frames interrupt the conductive path that allows cold to travel from outside through the frame and into the interior wall.

The result is a measurable improvement in R-value and U-value performance. Lower U-values mean less heat transfer. Higher R-values mean stronger insulation. For Winnipeg homes, both figures matter enormously during the heating season. Properly installed triple-pane windows can reduce heat loss through glass surfaces by 50 percent or more compared to older single-pane windows.

SmartTech's program also includes UV protection through low-E coatings, which prevents the fading of interior furniture, flooring, and upholstery. Soundproofing is an additional benefit. Triple-pane installations significantly reduce noise penetration from traffic, neighbours, and outdoor activity - a benefit that Winnipeg homeowners in busier areas of the city notice immediately after installation.

## In Their Own Words

"Winnipeg homeowners have told us the same thing for years: they know their windows are costing them money every winter, but the full replacement cost feels like too big a step. This program changes that equation. We put together a complete package -- the best products, certified installation, real financing, and a warranty that actually means something -- so the decision becomes simple. Stop losing heat. Start saving money. We handle the rest."

## Available Across All Winnipeg Neighbourhoods

The 2026 Energy-Efficient Window Upgrade Program is available to residential homeowners across the full greater Winnipeg service area. SmartTech technicians travel directly to the customer's home for consultation, measurement, and installation. No showroom visit is required.

Service coverage includes but is not limited to the following Winnipeg communities and surrounding Manitoba areas:

- River Heights, Crescentwood, and Tuxedo
- St. Vital, St. Boniface, and Windsor Park
- Transcona, East Kildonan, and North Kildonan
- Charleswood, Westwood, and St. James
- Wolseley, West End, and Elmwood
- North End, Point Douglas, and Downtown Winnipeg residential areas
- Surrounding municipalities including Stonewall, Selkirk, Steinbach, and Portage la Prairie

## How to Join the 2026 Program

Getting started takes one phone call. A SmartTech representative will schedule a free in-home consultation at a time that works for the homeowner. The technician arrives, assesses the property, walks through product and material options, and provides a written quote on the spot.

There is no obligation to proceed after the consultation. There is no pressure and no hidden cost. If the homeowner decides to move forward, SmartTech handles scheduling, permits where required, installation, and post-job follow-up from start to finish.

Winnipeg homeowners can reach SmartTech Windows and Doors by calling (204) 318-6162, by emailing the company directly, or by completing the contact form on the company website. Consultations are being scheduled on a first-come, first-served basis ahead of the fall heating season.

## ABOUT SMARTTECH WINDOWS AND DOORS WINNIPEG

SmartTech Windows and Doors is a family-owned and operated home improvement company headquartered at 646 Erin Street, Winnipeg, Manitoba, Canada. Founded in 1993, the company has 33 years of experience delivering residential window and door installation and replacement services across greater Winnipeg and surrounding Manitoba communities. Product offerings include triple-pane windows, casement windows, awning windows, vinyl windows, bow windows, double-hung windows, picture windows, fiberglass doors, steel entry doors, patio doors, storm doors, screen doors, French doors, garden doors, and multi-point lock security systems. All installations are performed by factory-

trained, licensed, and insured technicians. SmartTech holds accreditation from Canadian home construction associations and carries lifetime warranties on products and workmanship. Energy Star-certified options are available across the full product range.
