

# SpeedyIndex Launches Real-Time Bulk Google Index Checker REST API

SpeedyIndex Bulk Google Index Checker bypasses GSC limits. Instantly verify real-time SERP status for up to 100k URLs, backlinks, and competitors without domain ownership. Includes a free REST API for seamless SEO automation.

**Helsinki, Uusimaa May 13, 2026 ([IssueWire.com](https://www.issuewire.com)) - Global Launch of the Bulk Google Index Checker for Mass URL Verification**

SpeedyIndex, a leading provider of technical SEO and indexation solutions, today announced the global launch of its enterprise-grade [Bulk Google Index Checker](#). Designed to deliver absolute real-time accuracy, the new tool provides SEO agencies and link builders with a scalable, pay-as-you-go solution to verify the indexation status of massive URL lists programmatically.

## Overcoming Google Search Console Limits in Index Status Monitoring

For years, digital marketers have struggled with the limitations of Google Search Console (GSC). While essential, GSC restricts URL inspections to roughly 2,000 per property, suffers from a 3-to-4-day data lag, and strictly requires domain ownership. This leaves SEO professionals completely blind when auditing expensive backlink campaigns, analyzing competitor websites, or executing large-scale e-commerce migrations.

**The Backlink Indexing Crisis: Why Ahrefs and Semrush Fall Short in Live Verification**

Recent industry data highlights a growing indexation crisis: up to 40% of newly built backlinks fail to enter the search index within the first 30 days, and nearly 20% are permanently ignored due to Google's aggressive crawl budget optimization. While all-in-one SEO titans like Semrush and Ahrefs are excellent for historical backlink analysis and Domain Rating (DR) tracking, they do not provide real-time Google index verification. This leaves digital marketers completely blind, guessing whether their off-page SEO efforts are actually passing PageRank and Link Equity.

## Maximizing Link Building ROI: Stop Guessing and Check Google Index Status

"Let's be honest, link building is hard enough without having to guess if your links actually count," said Victor Dobrov, CEO of SpeedyIndex. "You can spend thousands of dollars negotiating the perfect guest post or building a Tier-2 network, but if Google ignores that page, your SEO ROI is exactly zero. Ahrefs and Semrush are incredible tools, but they simply don't check live Google indexation. We built this API to give you that missing piece of the puzzle—a friendly, blazing-fast way to know for sure that your links are alive and passing equity."

### Key Features of the SpeedyIndex Google Index Checker API:

- **Free REST API v2 for Developers:** Engineered for enterprise scale, the high-throughput API is provided completely free of charge. It allows seamless automation and bulk validation via Python, PHP, and Node.js integrations with zero reporting lag.
- **Check Any Website (No GSC Needed):** Instantly verify external backlinks, guest posts, PBNs, and competitor domains without needing site ownership verification.
- **Massive Scalability:** Users can upload up to 100,000 URLs in a single task via the Web App, Telegram Bot, or the free API, receiving a clean "Indexed" or "Not Indexed" report.
- **Live SERP Data & Title Extraction:** The tool bypasses cached databases to check live search results, extracting the actual live Title tag for every indexed page as ultimate proof of visibility.

## A Transparent Pay-As-You-Go SEO Tool for Bulk Index Checking

Unlike major SEO platforms that lock users into heavy monthly subscriptions, SpeedyIndex democratizes link auditing with a transparent Pay-As-You-Go model. Users purchase tokens that never expire, driving the cost of a live bulk index check down to just \$0.0007 per URL. There are no monthly commitments, no daily limits, and full access to the free API is included on all accounts.

### Test the Real-Time Index Checker with a Free Trial

To encourage digital marketers and developers to experience the speed of real-time auditing, SpeedyIndex is offering a free trial. New users who register will instantly receive 100 free tokens to test the platform's accuracy and speed without any financial commitment.

## About SpeedyIndex

[SpeedyIndex](#) is a comprehensive SEO technology ecosystem dedicated to search engine indexation and deep technical auditing. We help webmasters, link builders, and digital agencies maximize their SEO ROI through accurate data, automation, and transparent pricing. The platform offers a unified suite of tools:

- **Google Indexing Service:** A risk-free "Pay-Per-Result" indexer that drives real Googlebot

visits to accelerate indexation, automatically refunding tokens for any unindexed URLs.

- **Bulk Index Checkers (Google, Bing, Yandex):** Real-time mass verification tools to check the live SERP status of up to 100,000 URLs across major search engines, bypassing GSC limits.
- **Live Backlink Checker:** A powerful JS-rendering engine that audits donor pages to ensure your acquired backlinks are active, indexable, and successfully passing Link Equity.
- **Redirect & 404 Error Checkers:** Deep technical audit tools to identify broken links, Soft 404s, and harmful redirect chains that waste valuable crawl budget.
- **Noindex & 5xx Server Monitors:** Diagnostic utilities to detect hidden HTTP-level X-Robots-Tag blockers and server-side timeouts that prevent pages from ranking.
- **Free XML Sitemap Extractor:** A fast, completely free utility allowing SEOs to extract clean URL lists from heavy sitemaps for immediate bulk auditing.
