Albany, New York May 31, 2026 ([IssueWire.com](https://www.IssueWire.com)) - The Greenland Affair follows a covert U.S. intelligence mission that unravels into an international crisis involving the United States, China, and Russia. When a diplomatic assignment in Nuuk reveals a clandestine plot with global implications, the protagonist is thrust into a dangerous world of espionage, Arctic survival, and political deception.

“The Arctic is no longer a remote frontier — it’s a geopolitical flashpoint,” says author Michael K. Bender. “This novel explores what happens when the world’s superpowers collide in one of the most strategically important places on Earth.”

Key Themes

- Greenland’s rising geopolitical importance
- Arctic security and great-power competition
- Covert intelligence operations
- Climate-driven strategic change
- High-stakes diplomacy and international intrigue

About the Author

Michael K. Bender is a former U.S. Commercial Attaché with extensive experience in diplomacy, government, and international business. His background informs the novel’s realism and its portrayal of global decision-making, intelligence operations, and geopolitical strategy.
