

Windows Management Experts Achieves SOC 2 Type 2 Certification Holding Itself to the Same Standard It Sets for Clients

Pennsylvania-based Microsoft Solutions Partner completes rigorous third-party audit, reinforcing its commitment to enterprise-grade security and compliance. BENSALEM, PA — April 27, 2026 — Windows Management Experts, Inc. (WME),

Bensalem, Pennsylvania May 7, 2026 ([IssueWire.com](https://www.issuewire.com)) - A leading Microsoft Solutions Partner specializing in [IT Tech Migration](#), security, endpoint management, and IT staffing, today announced the achievement of SOC 2 Type 2 certification the most rigorous standard for service organization controls over security, availability, and confidentiality.

Unlike SOC 2 Type 1, which evaluates controls at a single point in time, Type 2 certification requires a sustained audit period that validates whether security controls are not only in place but consistently operational. For organizations in regulated industries — including financial services, healthcare, and manufacturing — this distinction matters significantly when vetting IT vendors.

Windows Management Experts (WME) has built a reputation for helping enterprise clients close compliance gaps. The firm's portfolio includes documented cases of improving client compliance scores from 21% to 99%, deploying Microsoft Sentinel to neutralize active security breaches, and executing zero-downtime migrations for organizations with thousands of users. Achieving SOC 2 Type 2 certification means WME now applies that same operational discipline internally.

"Our clients trust us with their most sensitive environments — Microsoft 365 tenants, security infrastructure, endpoint management, identity systems. SOC 2 Type 2 certification is our formal commitment that we operate with the same rigor we bring to every client engagement."

— Matthew Tinney, Founder & Chief of Strategic Partnerships, WME

Founded in 2008 and headquartered in Bensalem, Pennsylvania, WME serves 500+ global brands across financial services, healthcare, manufacturing, public sector, and high-tech industries. The firm holds Microsoft Solutions Partner designations across Security, Infrastructure, Data & AI, and Digital & App Innovation — and has been recognized on the Inc. 5000 list of fastest-growing private companies.
