Petach Tikva, Centre Jun 11, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Author and scientist G.G.R. Scovel invites readers to explore the challenges and possibilities of humanity's future through Roller Closer Ride, the opening novel in the Green Sands Trilogy.

Drawing upon a lifetime of scientific inquiry and observation, Scovel combines imaginative storytelling with thought-provoking questions about environmental change, social evolution, and the resilience of human communities. The result is a work of speculative fiction that reaches beyond entertainment to examine issues that increasingly shape modern discussions about the future.

Roller Closer Ride explores how individuals and societies respond when established systems are challenged and new realities begin to emerge. Through a compelling narrative, the novel examines adaptation, innovation, cooperation, and the enduring human drive to build a sustainable future amid uncertainty.

What distinguishes the novel is its connection to a broader body of work focused on civilization, sustainability, and long-term societal development. Readers familiar with Scovel's nonfiction book, ReSeeding Civilization, will recognize many of the larger themes that continue throughout his writing. Together, his fiction and nonfiction works form an ongoing exploration of how societies evolve, how they respond to disruption, and what opportunities may arise from periods of transformation.

As the first installment in the Green Sands Trilogy, Roller Closer Ride introduces readers to a world shaped by environmental and social change while encouraging reflection on the choices that influence humanity's future. The novel appeals to readers interested in speculative fiction, science-inspired storytelling, sustainability, and the forces that shape civilizations over time.

Scovel's unique perspective is informed by his professional background in genetics and plant breeding, disciplines that have long focused on adaptation, development, and long-term outcomes. These interests are reflected throughout his writing, where scientific curiosity and imaginative storytelling intersect.

Roller Closer Ride is available through Amazon and major online booksellers.

About the Author

G.G.R. Scovel is an author, scientist, and researcher whose professional career includes work in genetics and plant breeding. Through both fiction and nonfiction, he explores themes related to sustainability, societal development, environmental change, and the future of civilization. His works include ReSeeding Civilization and the Green Sands Trilogy.
