

Beaver Biodiesel Inc. Files \$1.25 Lawsuit Against Green Planet Bio-Fuels Inc., Exposing Fraud, Collusion, and Harassment

Led by Corporate Counsel Raheel Nasir, this aggressive legal action exposes a shocking campaign of corporate fraud, illegal collusion, and the targeted harassment of Beaver Biodiesel employees and their families.

BEAVER

BIODIESEL INC.

Hamilton, Ontario Jun 16, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Beaver Biodiesel Inc. has initiated a fierce \$1.25 million lawsuit in the Ontario Superior Court of Justice against competitor Green Planet Bio-Fuels Inc. Led by Corporate Counsel Raheel Nasir, this aggressive legal action exposes a shocking campaign of corporate fraud, illegal collusion, and the targeted harassment of Beaver Biodiesel employees and their families.

The Statement of Claim meticulously details Green Planet's predatory and deceitful tactics. Under Nasir's direction, the lawsuit reveals that Green Planet engaged in severe market manipulation by illegally removing Beaver Biodiesel's equipment without notice and falsely promising suppliers they would "buy out" their existing contracts. Demonstrating a complete disregard for the law, Green Planet even encouraged business owners to fraudulently backdate agreements and provided improper "legal

advice" to circumvent binding contracts.

The filing uncovers disturbing attempts at industry collusion, noting that a Green Planet representative attended Beaver Biodiesel's Hamilton facility to solicit employees and propose collusive, non-compete arrangements. When these corrupt tactics failed, Green Planet resorted to spreading malicious lies—falsely claiming Beaver Biodiesel was affiliated with a sanctioned US company—and actively harassing Beaver Biodiesel's employees, associates, and their families.

"We are drawing a hard line against the blatant fraud, deceit, and mafia-style tactics infecting this industry," said Raheel Nasir, Corporate Counsel for Beaver Biodiesel. "Green Planet's willingness to collude, harass families, and trick local restaurants into committing fraud is abhorrent. We will fiercely protect our business and use every legal avenue to crush this corruption."

With Nasir aggressively leading the litigation, Beaver Biodiesel is taking a ferocious stand to protect its partners and enforce legal accountability in an industry plagued by dishonest competitors. The lawsuit seeks damages for inducing breach of contract, defamation, fraud, and unlawful interference, signaling that Beaver Biodiesel will fiercely defend its rightful business and the integrity of the market.

About Beaver Biodiesel Inc.

Beaver Biodiesel Inc. is a 100% Canadian-owned and operated company committed to advancing the circular industrial ecosystem through innovative recycling and renewable energy solutions. Founded by Hamilton native Sumit Majumdar, the company transforms waste streams into sustainable resources, playing a critical role in preventing CO₂e emissions and building a cleaner, more resilient energy infrastructure across North America.
