

Beaver Biodiesel Inc. Files \$3 Million Suit Against Green Oil Inc. Exposing Deceptive Cash Schemes, Market Manipulation

Spearheaded by Beaver Biodiesel's Corporate Counsel, Raheel Nasir, this decisive legal action aims to dismantle a malicious campaign of corporate sabotage, trespass, and deceit perpetrated by Green Oil against Ontario's food-service suppliers.

Hamilton, Ontario Jun 16, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Beaver Biodiesel Inc. has launched an aggressive \$3.75 million lawsuit in the Ontario Superior Court of Justice against competitor Green Oil Incorporated. Spearheaded by Beaver Biodiesel's Corporate Counsel, Raheel Nasir, this decisive legal action aims to dismantle a malicious campaign of corporate sabotage, trespass, and deceit perpetrated by Green Oil against Ontario's food-service suppliers.

The Statement of Claim exposes Green Oil's illicit and highly predatory business practices. Under Nasir's relentless legal scrutiny, the lawsuit reveals that Green Oil has intentionally interfered with Beaver Biodiesel's exclusive contracts by trespassing on protected properties and refusing to remove unauthorized equipment. Far worse, the filings allege that Green Oil has been systematically cheating local restaurants by misreporting collection volumes—deliberately representing smaller quantities of oil than were actually collected to shortchange suppliers.

To further conceal the true value and volume of the stolen oil, Green Oil engaged in shady, under-the-table cash payments designed to manipulate the market and deceive hardworking business owners. When confronted, Green Oil resorted to spreading malicious lies and defamatory statements, falsely telling suppliers that Beaver Biodiesel lacked the authority to service its own clients.

"We will not tolerate bad actors who rely on fraud, deceit, and market manipulation to survive," said Raheel Nasir, Corporate Counsel for Beaver Biodiesel. "Green Oil's blatant disregard for the law and their willingness to cheat local businesses using concealed cash schemes is exactly the kind of corruption we are going to root out of this industry. Beaver Biodiesel operates with total transparency, and we are using the full force of the law to hold these predatory operators accountable."

With Nasir leading the charge, Beaver Biodiesel is taking a ferocious stand to protect its partners and clean up an industry plagued by dishonest competitors. The lawsuit seeks millions in damages for inducing breach of contract, defamation, trespass, and unlawful interference, signaling that Beaver Biodiesel will fiercely defend its rightful business and the integrity of the Canadian market.

About Beaver Biodiesel Inc.

Beaver Biodiesel Inc. is a 100% Canadian-owned and operated company committed to advancing the circular industrial ecosystem through innovative recycling and renewable energy solutions. Founded by Hamilton native Sumit Majumdar, the company transforms waste streams into sustainable resources, playing a critical role in preventing CO2e emissions and building a cleaner, more resilient energy infrastructure across North America.
