

Celsius Herbs Brings Non-Toxic Pet Ear and Skin Treatments Vets Trust

Farmington, Michigan Jun 30, 2026 ([IssueWire.com](https://www.IssueWire.com)) - A trip to the vet for an ear infection or a skin problem can cost a lot. And it often comes back a few months later. Most pet treatments use strong chemicals to get fast results, and those chemicals can bring their own risks. [Celsius Herbs](#) does it differently. The company makes pet care products from organic plants, and every formula is checked by a veterinarian before it goes on sale.

The pet range covers ear infections, ear mites, skin irritation, hot spots, gland problems, and flea and tick protection. None of the formulas use parabens, sulfates, phthalates, fake fragrances, or strong preservatives. Every plant ingredient is certified organic and pulled out using a cold process, with no heat and no alcohol. This keeps the natural ingredients whole, right up until the product reaches your pet.

The formulas work through something the company calls Bio Hydrocolloidal technology, which is currently patent pending. It is a water-based method that uses natural gelling agents to carry plant ingredients deep into the skin, deeper than a regular cream or spray can go. Since there is no heat or alcohol involved, the active ingredients stay strong without needing chemical preservatives.

Every product is made in the United States in a facility that follows Good Manufacturing Practice rules. Before any batch goes on sale, an outside lab tests it for heavy metals, bacteria, and overall quality. The brand also shares a full list of the chemicals it will never use.

Pet owners who tried the ear infection treatment say they saw real change within two weeks. Less redness. Less odor. Less head shaking. The flea and tick formula works without pesticides, which makes it a safer fit for homes with kids or more than one pet.

The pet line sits next to a human line at Celsius Herbs, sold under the Dermveda name and covering skin, hair, foot, and intimate health. The company started in 2019, after its founders took a trip to the Himalayas and came home wanting to mix old Ayurvedic plant knowledge with modern science.

You can find every product on their site. Orders ship free within three days, and if something is not right, you get your money back, no questions asked.

- Shipping: Free, 3 days, across the USA

Why It Matters

A lot of pet products carry a warning to keep kids and other animals away from the treated spot. That warning usually means strong chemicals are at work. Celsius Herbs products do not carry that risk. Every ingredient is safe, even if your pet licks the area right after treatment, so you still get something gentle that does the job.

"Pet owners should not have to choose between something that works and something that is safe. We built this range so they never have to make that choice."

— Celsius Herbs Founder

About Celsius Herbs

Celsius Herbs is a natural health company based in Farmington, Michigan. Started in 2019, the company builds organic, non-toxic products for both people and pets, using its own Bio Hydrocolloidal delivery method to make every formula work without harsh chemicals. All products are vegan, cruelty-free, and made in the USA, with a 100 percent money-back guarantee on every order. Learn more at www.celsiusherbs.com or call +1 (734) 726-0148.
