

# Cool Room Master Expands Premium Cold Room Panel Supply Across Adelaide and South Australia

South Australian-Owned Supplier Delivers High-Performance EPS Insulated Panels, Custom Sizing, and Fast Local Service for Commercial Cold Storage Projects

## COOL ROOM MASTER

**Adelaide , South Australia Jun 1, 2026 ([Issuewire.com](https://www.issuewire.com))** - Cool Room Master, a leading South Australian-owned supplier of insulated building solutions, is strengthening its position in the cold storage industry by providing premium-quality cold room panels across Adelaide and regional South Australia. With a focus on energy efficiency, durability, and fast turnaround times, the company continues to support businesses seeking reliable cold storage, cool room, freezer room, and temperature-controlled building solutions.

As demand for efficient refrigeration infrastructure grows across food processing, hospitality, agriculture, pharmaceutical, and retail sectors, Cool Room Master offers a comprehensive range of EPS insulated panels designed to deliver superior thermal performance while reducing operational energy costs.

### Premium Cold Room Panels Designed for Australian Conditions

Cool Room Master supplies EPS insulated panels in 35mm, 50mm, and 75mm thicknesses, available directly from its Adelaide warehouse. The panels are engineered to withstand South Australia's demanding climate conditions while maintaining consistent internal temperatures for cold storage applications.

The company's products feature:

- High-density EPS insulation cores
- Durable steel skins for long-term performance
- Z-lock interlocking systems for fast installation
- Cut-to-length custom manufacturing
- Food-safe and hygienic finishes
- Commercial and residential application suitability

Unlike many imported alternatives, Cool Room Master's insulated panels are designed with stronger materials and transparent specifications, giving customers confidence in both performance and value.

### Supporting Adelaide Businesses with Better Cold Storage Solutions

Cold room panels are essential for maintaining product quality and regulatory compliance in temperature-sensitive environments. Cool Room Master serves a wide range of industries including:

- Cafés and restaurants
- Supermarkets and grocery stores
- Butcher shops
- Food processing facilities
- Pharmaceutical storage facilities
- Agricultural and farming operations
- Florists and beverage storage facilities

By offering local stock availability and rapid quote turnaround, the company helps businesses avoid costly project delays and interstate shipping complications.

### Stronger Panels. Better Performance.

Cool Room Master differentiates itself through enhanced product specifications. Many of its premium panel systems feature:

- 0.45mm steel skin thickness
- 16kg/m<sup>3</sup> EPS foam density
- Improved structural strength
- Enhanced thermal insulation performance
- Reduced energy consumption

These features help businesses lower refrigeration costs while extending the lifespan of their cold storage facilities.

### Beyond Cold Rooms: Modular Container Houses and Insulated Buildings

In addition to cold room panels, Cool Room Master also supplies insulated modular container houses and prefabricated building solutions. These structures are suitable for:

- Site offices
- Home studios
- Granny flats
- Agricultural buildings
- Outdoor storage rooms

- Temporary accommodation

The company also offers Rockwool and PIR panel options for projects requiring advanced fire resistance and thermal performance.

### Customer-Focused Service and Honest Pricing

As a proudly South Australian family-owned business, Cool Room Master remains committed to delivering transparent pricing, honest product information, and expert technical guidance.

Customers can receive recommendations based on room size, desired operating temperature, and project requirements. The company's experienced team assists clients in selecting the most suitable panel thickness, trims, and accessories to maximise performance and minimise costs.

### About Cool Room Master

Cool Room Master is a South Australian-owned supplier specialising in EPS cool room panels, cold room panels, insulated building systems, and modular container houses. Operating from Adelaide, the company supplies energy-efficient insulation solutions to businesses and homeowners throughout South Australia and Australia-wide.

With a commitment to quality materials, transparent specifications, and outstanding customer service, Cool Room Master continues to help Australian businesses build stronger, more efficient, and more cost-effective temperature-controlled environments.
