

## Darren and Mike Launch Comprehensive Coaching Training Program to Empower the Next Generation of Digital Entrepreneurs

Online business mentors expand their Dream Team Community with a structured coaching curriculum as early members report meaningful progress.

**Vancouver, British Columbia Jun 25, 2026** ([Issuewire.com](https://www.issuewire.com)) - [Darren and Mike, the online business mentors behind the Dream Team Community](#), has announced the continued growth of their Coaching Training Program, a structured curriculum designed to give aspiring digital entrepreneurs a clear, step-by-step pathway to building an online business. Launched earlier this year inside the Dream Team Community platform, the program has expanded its membership and is reporting early member milestones as it builds a reputation as one of the most organized training options in the network marketing and digital business space.

The program addresses a gap that Darren and Mike say derails most newcomers to online business: a lack of structure. Rather than leaving members to assemble advice from scattered sources, the Coaching Training Program packages the duo's own methodology, including content creation, social media lead generation, customer-relationship systems, and follow-up automation, into a sequenced curriculum supported by recurring live training.

"Most people who try to start an online business don't fail for lack of effort. They fail because no one ever gave them a clear path to follow," said Darren Ewert. "We built this program to be the map we wish we'd had when we started. The goal is simple: remove the guesswork and let people focus on doing the work."

Since its launch, the program has drawn interest from a cross-section of aspiring entrepreneurs, established business owners looking to grow their business online, and network marketing professionals researching more structured training. Early participants, many with no prior marketing background, have reported reaching initial milestones in building and organizing their own online operations, though the company emphasizes that individual results vary and are not guaranteed.

"What's been most rewarding is watching people who felt completely lost suddenly have a system they can actually execute," said Mike Dreher. "We're not promising anyone a result. We're giving them a structure and a community, and the rest comes down to consistency."

The Coaching Training Program sits within the broader Dream Team Community, a global membership that Darren and Mike have grown over nearly a decade as independent distributors in the Enagic network marketing organization. The program is positioned as a structured pathway for members who want to treat their venture as a genuine business rather than a casual side project.

As demand for flexible, location-independent income continues to grow, Darren and Mike say the program reflects a broader shift toward education-first, community-driven models in the digital business space, and away from the hype that has long characterized parts of the industry.
