

## Dex System Announces Expanded Catalog with New Titles from Liam Conrad and Ronald Bartholomew

Nonfiction Power and Supernatural Fiction — New Additions to the Growing Dex System Library

**Los Angeles, California Jun 19, 2026 ([IssueWire.com](https://www.issuewire.com))** - Dex System, the AI-powered creative engine that writes books using artificial intelligence, announces the latest additions to its catalog: two new titles spanning geopolitical nonfiction and supernatural fiction — alongside expanded availability for established author Liam Conrad's complete backlist.

Liam Conrad remains one of the cornerstone voices in the Dex System nonfiction catalog. His complete works — including the newly spotlighted *War and Wisdom* — are now available across major retail platforms. Conrad's body of work forms one of independent publishing's most unflinching examinations of modern geopolitics and conflict. From the clandestine alliances that shaped the post-9/11 world to the deep strategic logic driving wars across the Middle East and beyond, Conrad writes with the precision of an analyst and the urgency of a reporter who has followed the story all the way to its sources.

Ronald Bartholomew returns to the Dex System catalog with *The Good Ghost: A Tale of Choice*, published under the E-Drive imprint. Part ghost story, part moral reckoning, the book explores what haunts us when choices can no longer be undone — and what redemption looks like when the stakes have moved beyond the living world.

"This release slate represents exactly what Dex System has been built to do," said a spokesperson for the imprint. "Liam Conrad's four-book backlist alone gives readers a complete education in how power

really works in the modern world. Add Bartholomew and you have a catalog that moves from geopolitical realism to the most unsettling edges of the human conscience."
