

Digicode's DigerRGS iGaming Platform Achieves Prestigious GLI-19 Certification

DigerRGS GLI-19 Certified

Plano, Texas Jun 2, 2026 ([Issuewire.com](https://www.issuewire.com)) - [Digicode](https://www.digicode.com), a leading global provider of enterprise digital solutions for regulated industries, is proud to announce that its flagship iGaming product, **DigerRGS**, has officially received the **GLI-19 (Interactive Gaming Systems)** certification from Gaming Laboratories International (GLI).

The GLI-19 is a widely adopted global standard for interactive gaming systems. Achieving this certification serves as a definitive "gold seal" of approval, confirming that DigerRGS meets the highest global benchmarks for security, fairness, and technical integrity. For operators and game studios, this milestone significantly streamlines the path to entry into highly regulated markets worldwide.

DigerRGS is a high-performance, cloud-native Remote Game Server (RGS) designed to handle the rigors of modern iGaming. It provides the main infrastructure for game delivery, including game engines and advanced analytics, allowing developers to launch premium content at scale while retaining full technical ownership.

"Securing the GLI-19 certification for DigerRGS is a pivotal moment in our mission to empower the iGaming ecosystem," said **Max Maslii, Global CEO of Digicode**. "In an industry where the regulatory landscape is constantly shifting, our partners need more than just a platform; they need a foundation of trust. This certification proves that DigerRGS is built to the highest possible standard, ensuring our clients can scale rapidly into new jurisdictions without compromising on security or compliance."

The certification process involved a rigorous audit of the platform's core functionality. Areas reviewed included player protection and privacy controls.

- **System security and data protection**
- **Operational integrity and reporting accuracy**
- **Game logic consistency and RNG integration**
- **Player protection and privacy controls**

With the addition of GLI-19, DigerRGS continues to solidify its position as a preferred solution for organizations operating in complex environments where performance and regulatory adherence are non-negotiable.

About Digicode

[Digicode](#) is a full-cycle AI-enabled product development company that designs and delivers enterprise digital solutions for organizations operating in complex and regulated environments. Digicode works with organizations on complex digital initiatives, including enterprise systems, integrations, and long-term software development. The company operates internationally and focuses on projects where ownership and technical responsibility remain with the client.
