kolkata, West bengal Jun 3, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Rajiv Ghosh, Founder and CEO of Digital Aptech, will be visiting London from 1st June to 5th June 2026 as part of the company's ongoing efforts to strengthen relationships with businesses seeking reliable technology and digital transformation partners.

During his visit, Rajiv will be meeting business heads, technology partners, and decision-makers who are looking to improve operational efficiency, modernize existing systems, and leverage technology to drive sustainable growth.

The meetings will focus on understanding business challenges and exploring how technology can help organizations reduce costs, improve productivity, and scale more effectively. Rajiv believes that successful digital transformation begins with understanding business objectives before recommending technology solutions. This consultative approach has helped Digital Aptech support organizations in improving workflows, streamlining operations, and achieving measurable business outcomes.

The London visit presents an opportunity for business leaders and technology partners to engage in meaningful discussions around innovation, software development, AI adoption, process automation, and digital transformation strategies. It also provides a platform to explore potential collaborations and partnerships that can create long-term business value.

If you are interested in meeting Rajiv Ghosh during his London visit, do schedule a discussion in advance.
