Relieve Pain. Restore Movement.
Live Life Again.

-  Advanced Technology
-  Experienced Surgeons
-  Safe & Reliable
-  Affordable Care

 World-Class Care. Trusted in India.

 Stronger Shoulders.
Better Tomorrow.

Faridabad, Haryana Jun 10, 2026 ([Issuewire.com](https://www.issuewire.com)) - DivinHeal Launches India's Most Comprehensive Medical Tourism Platform - Connecting Global Patients to World-Class Healthcare

DivinHeal, operating under the mission of "Simplifying Global Wellbeing," has officially launched as a full-service medical tourism platform connecting patients from Africa, the Middle East, Southeast Asia, and beyond with India's most respected hospitals and specialist physicians. The platform covers over 20 medical specialties - including Cardiac Care, Oncology, Organ Transplant, IVF and Fertility Treatment, Orthopedics, Neurology, Bariatric Surgery, Dental Care, and more - providing transparent pricing, dedicated care coordination, and end-to-end logistical support for every patient.

The global healthcare access crisis is stark. A coronary bypass surgery costs \$80,000-\$150,000 in the United States. A liver transplant costs \$300,000-\$500,000. An IVF cycle: \$15,000-\$25,000. For the hundreds of millions of people in developing nations who need these treatments, Western prices are not merely high - they are impossible. DivinHeal's answer is direct: India's hospitals deliver equivalent outcomes at 60-80% lower cost, and DivinHeal makes accessing them straightforward.

"We built DivinHeal because life-saving medical treatment should not depend on the country where you were born," said a DivinHeal spokesperson. "India has world-class surgeons, JCI-accredited hospitals, and the full range of modern medical technology. The barrier has never been quality - it has been access, information, and trust. DivinHeal removes all three barriers at once."

A Platform Built Around the Patient, Not the Hospital

Unlike traditional medical tourism models that simply list hospitals, DivinHeal operates as a dedicated care coordination partner. Every patient is assigned a personal care coordinator from the moment of first inquiry. The coordinator reviews medical records, connects the patient with the most appropriate specialist - matched by condition, not merely by availability - arranges the full pre-operative assessment, manages hospital admission, provides interpreter services, organises accommodation for accompanying family members, and conducts daily welfare check-ins throughout the patient's stay.

Post-discharge, DivinHeal does not disappear. Follow-up consultations, telemedicine reviews with the treating physician, medication procurement support, and rehabilitation coordination continue after the patient returns home.

Network Built on Clinical Excellence, Not Commission

DivinHeal's [hospital network](#) is curated on the basis of clinical quality. Partner hospitals hold JCI and NABH accreditation - the international and national gold standards for hospital quality and patient safety. Specialist physicians within the network include cardiac surgeons trained at the Cleveland Clinic and Royal Brompton, oncologists with fellowships at MD Anderson and the Royal Marsden, transplant surgeons with experience at leading European programmes, and reproductive endocrinologists with international publication records and clinical outcomes that benchmark against global fertility clinic data.

"We do not partner with every hospital in India," the spokesperson noted. "We partner with the hospitals and specialists whose outcomes, infrastructure, and international patient experience meet our quality standard. A patient trusting DivinHeal with their health deserves nothing less."

Treatments and Cost Benchmarks

DivinHeal's platform covers the full breadth of complex medical care. Selected cost comparisons illustrate the scale of the financial advantage:

Coronary artery bypass surgery: \$5,500-\$9,000 in India vs \$80,000-\$150,000 in the US. Kidney transplant: \$13,000-\$18,000 vs \$150,000-\$300,000. Liver transplant: \$30,000-\$45,000 vs \$300,000-\$500,000. IVF cycle: \$2,500-\$4,000 vs \$15,000-\$25,000. Total knee replacement: \$4,500-\$7,000 vs \$30,000-\$50,000. Brain tumour surgery: \$6,000-\$10,000 vs \$100,000+. Cancer targeted therapy (annual): \$5,000-\$15,000 vs \$70,000-\$150,000.

All pricing is fully inclusive and itemised before any patient commitment is made. DivinHeal operates on a zero hidden-charge policy.

Serving Patients Who Have Been Underserved for Too Long

DivinHeal's patient base reflects the global breadth of the unmet need. Cardiac surgery patients from Nigeria and Ghana who cannot access valve repair at home. Kidney failure patients from Bangladesh for whom transplantation has been a distant dream. IVF patients from Kenya who have exhausted their

savings on a single failed Western cycle. Cancer patients from the Middle East are seeking access to immunotherapy that costs less than a tenth of European prices.

For these patients, DivinHeal is not a convenience - it is the difference between receiving treatment and not.

Digital-First, Globally Accessible

DivinHeal's platform is designed for international accessibility. Free consultations are available via telemedicine, allowing patients to receive specialist input without leaving their home country. Medical records can be submitted digitally for remote review and second opinions. Treatment plans, cost breakdowns, and hospital recommendations are provided electronically before any travel decision is made.

The website - available in English and Arabic, with additional languages in development - provides detailed information on every treatment specialty, hospital profiles, physician credentials, and patient support services.

About DivinHeal

DivinHeal is a medical tourism platform built on the belief that world-class healthcare should be accessible to every patient, regardless of geography or economic circumstance. The company connects international patients with India's leading hospitals and specialist physicians across 20+ medical specialties, providing end-to-end care coordination that simplifies every dimension of medical travel - from first inquiry to final recovery.

DivinHeal is headquartered in India and serves patients from across Africa, the Middle East, South Asia, Southeast Asia, and beyond.
