

Energy Risk and Investment, Global Growth and Capital Shifts Top the Agenda for Platform Global 2026

Platform Global announces the programme launch for the 5th Anniversary conference in Antibes

London, United Kingdom Jun 11, 2026 ([IssueWire.com](https://www.issuewire.com)) - Following another sold-out event last year, [Platform Markets Group](#) announces a new program for the 5th anniversary three-day edition of Platform Global, which includes the annual awards celebration taking place in Antibes/Juan-les-Pins 8-10 September 2026.

In just five years Platform Global has quickly become recognized as one of the leading conferences for high-end networking, quality content and deal ignition for the digital infrastructure industry, bringing together an exceptional group of leaders, innovators and decision-makers from across the global ecosystem. C Level delegates represented 72% of all attendees last year.

This year is more timely than ever, as the conference looks ahead at a staggering \$7 trillion¹ global data center investment over the next five years required to keep pace with AI-driven growth, potentially doubling global capacity.

With a strong focus on the issues and opportunities related to financing and powering the AI revolution, the program offers key stakeholders, owners and investors the ability to prepare for increased scrutiny, increased risk and increased complexity in the industry.

While risk has always been at the forefront of investor sentiment, digital infrastructure will be impacted by geopolitical and sovereignty challenges. The Platform Global 2026 program includes eminent experts in these areas who offer real insight into significant changes in investment strategies, player business

models and the opportunities that lie ahead.

“[Schneider Electric](#) is proud to support the event as a founding partner and continue our long-standing relationship with the Platform Markets Group team, whose exceptional expertise in the industry has helped create another highly respected forum for the sector. As AI accelerates growth across the industry, open collaboration and meaningful dialogue have never been more important.”

The conference is held in the secluded Mediterranean resort town of Antibes/Juan-les-Pins with an enviable variety of social interactions, including a conference beach party and awards ceremony open to attendees at this all-premium ticket event.

“Platform Global has grown to become a recognized quality annual forum for deal makers in the data center industry,” commented Gregory Gerot, managing director of Platform Markets Group. “The quality of our content and networking is reflected in the fact that the event has sold out over the past two years.”
