

Fusion Launches a Powerful No-Code Form Builder Built for Salesforce User

Empowering Businesses to Build Intelligent, Mobile Friendly Forms Natively Within Salesforce No Coding Required

The graphic features a dark blue background with gold and blue confetti. On the left, the 'Forms Fusion' logo is at the top, followed by a 'PRESS RELEASE' button. Below this, the text 'Now Live: Forms Fusion' is prominently displayed. A list of features includes 'The Future of Salesforce Forms', 'No-Code Forms. Real-Time Results.', '100% No-Code', 'Secure & Compliant', 'Mobile Responsive', and 'Seamless Salesforce Integration'. On the right, a screenshot of the 'Forms Fusion Builder' interface is shown, featuring a 'Salesforce' logo in a blue cloud. The interface includes a 'Fields' sidebar with options like Text, Email, Phone, Mobile, Date, Checkbox, File Upload, and Signature. The main form area contains fields for Full Name, Email, Phone, and a dropdown for Public. A 'Submit' button is at the bottom. A 'Properties' sidebar on the right includes 'Field Settings' with 'Required' checked, 'Unlog', and 'Read Only' options, along with 'Label', 'Signature', 'Placeholder', and 'Help Text' sections. A blue megaphone icon and an 'ANNOUNCEMENT' button are positioned at the bottom right.

Austin, Texas Jun 12, 2026 ([IssueWire.com](https://www.issuewire.com)) - Introducing Forms Fusion: A next generation QR Based No-Code Form Builder designed specifically for Salesforce users. Create powerful forms, streamline data collection and automate workflows effortlessly all without coding.

Collecting and managing data shouldn't slow your business down. Forms Fusion helps organizations streamline workflows, eliminate manual data entry and capture information in real time, ensuring teams have access to accurate data when they need it most.

Key Features & Capabilities

- **QR Code Integration:** Instantly generate and share forms via QR codes, enabling seamless access for field teams, events and customer facing interactions.
- **Drag and Drop Builder:** An intuitive visual interface that allows users to construct complex forms in minutes, with no technical expertise required.
- **Mobile Friendly Design:** Fully responsive forms that deliver a consistent, polished experience across all devices, desktops, tablets and smartphones.
- **Conditional Logic:** Build intelligent forms that adapt dynamically to user inputs, displaying

relevant fields based on real time responses for a smarter data collection experience.

- **Built for Every Industry:** We help businesses across Healthcare, Manufacturing, Education, Real Estate, Retail & E-Commerce, Nonprofits, Finance & Banking and many more industries streamline operations and drive growth.
- **Native Salesforce Integration:** Seamlessly connects with Salesforce objects and workflows, ensuring form submissions are automatically reflected in the CRM without manual data entry or third party connectors.

"Forms Fusion was built with one vision in mind to give every Salesforce user the power to create smart, professional forms without relying on developers. We believe that technology should simplify business processes and our platform does exactly that."

— Sunny Patwa, CEO, Forms Fusion

Forms Fusion was built with one vision in mind — to give every Salesforce user the power to create smart, professional forms with QR functionality without relying on developers. We believe that technology should simplify business processes, and our platform does exactly that.
