

FYNOR Partners with Singapore and Dubai Digital Asset Funds to Launch 20M USDT Support for FYC Ecosystem

Bizana, Eastern Cape Jun 28, 2026 ([Issuewire.com](https://www.issuewire.com)) - Recently, FYNOR, a global digital finance ecosystem platform, officially announced that the company has reached a strategic partnership with international digital asset funds from Singapore and Dubai. According to the cooperation plan, the strategic partnership fund will invest **20 million USDT**, dedicated to the ecosystem development, global market promotion, liquidity support, and market value management of FYNOR's platform ecosystem token, FYC (FYNOR Coin). This will provide continuous strategic support for the long-term development and global ecosystem expansion of FYC.

This partnership marks an important step forward for FYNOR in global digital asset ecosystem development, international capital cooperation, and the construction of a long-term value system for its platform token. As the core token of the FYNOR platform ecosystem, FYC will play a key role in connecting the platform's trading ecosystem, AI-powered strategy system, quantitative copy trading ecosystem, RWA real-world asset development, community governance, and global market network.

FYNOR stated that the strategic partnership fund will focus on four key areas.

First, it will provide dedicated support for FYC ecosystem development. The platform will continue to improve FYC's application across multiple scenarios, including trading fee discounts, VIP membership benefits, AI strategy access, copy trading ecosystem benefits, platform event participation, community governance voting, and RWA ecosystem participation, further enhancing FYC's circulation value and application depth within the platform ecosystem.

Second, it will promote global market expansion. FYNOR will focus on key markets including Africa, Asia, the Middle East, South Asia, and Latin America, gradually building a global node alliance system and regional community operation network to strengthen the platform's brand influence, user reach, and ecosystem collaboration efficiency in the global digital asset market.

Third, it will enhance market liquidity support. The strategic partnership fund will provide financial support for FYC's future ecosystem circulation, market depth development, and trading environment optimization, helping the platform build a more stable, healthy, and sustainable liquidity foundation.

Fourth, it will support long-term market value management. FYNOR will focus on long-term ecosystem development goals, continuously improving FYC's value-carrying system based on platform business growth, ecosystem application expansion, and market performance. This will promote a long-term relationship of co-building, sharing, and mutual growth among the platform ecosystem, community users, global nodes, and partners.

FYNOR believes that the global digital asset industry is gradually shifting from competition among single trading platforms to competition in comprehensive ecosystem capabilities. Platforms with long-term development potential will require not only trading infrastructure, but also AI technology capabilities, global market expansion capabilities, RWA asset connectivity, community governance, and a sustainable long-term token economy model.

Based on this industry trend, FYNOR is continuously advancing its five-in-one platform strategy of "Trading + AI + Community + RWA + Global Ecosystem." As the core value hub of FYNOR's global digital finance ecosystem, FYC will play an increasingly important role in connecting the platform's future ecosystem development.

This strategic partnership with Singapore and Dubai international digital asset funds not only reflects international capital's recognition of FYNOR's platform development direction, but will also further accelerate the global ecosystem development of FYC. With the gradual deployment of the strategic partnership fund, FYNOR will continue to improve its platform infrastructure, strengthen its global market layout, expand FYC's application scenarios, and drive the platform ecosystem into a more stable, long-term, and globalized stage of development.

FYNOR will take this strategic partnership as an important starting point to continue promoting the implementation of FYC's ecosystem value and build a more globally competitive digital finance ecosystem network.

FYC is not only a platform token.
It is also the core value hub of FYNOR's global digital finance ecosystem.
