Kelly Bacot Highlights the Growing Importance of Personalized Tutoring in Student Success

Oklahoma City, Oklahoma Jun 8, 2026 ([IssueWire.com](https://www.IssueWire.com)) - As students continue to face academic challenges brought on by learning gaps, changing classroom environments, and increasing performance expectations, experienced educator Kelly Bacot is emphasizing the value of personalized tutoring as a powerful tool for helping children build confidence and improve academic outcomes.

With more than 24 years of classroom experience, Bacot has spent her career helping students develop the skills they need to succeed. A certified K-8 teacher, certified reading specialist, and early childhood education specialist, she is now expanding her efforts beyond the traditional classroom by offering individualized tutoring services focused on reading and math development.

Bacot believes that one-on-one and small-group instruction can make a significant difference for students who may be struggling to keep pace academically or who simply need additional support to reach their full potential. “Every child learns differently,” Bacot said. “Some students need extra time, targeted instruction, or a different approach to fully understand a concept. Tutoring provides an opportunity to meet students where they are and help them build the confidence they need to succeed.”

The demand for tutoring services has grown substantially in recent years as educators and parents work to address learning gaps that emerged during periods of educational disruption. Research continues to show that personalized instruction can improve academic performance, increase student engagement, and strengthen long-term learning habits.

For Kelly Bacot, tutoring is about much more than improving grades. She sees it as an opportunity to help students develop a stronger relationship with learning itself. “When students experience success, even in small steps, they begin to believe in their abilities,” she said. “That confidence often carries over into the classroom and into other areas of their lives.”

Bacot’s qualifications and experience position her uniquely to provide that support. She earned her teaching certification from East Central University and later completed a master’s degree in reading from Oklahoma State University. Throughout her career, she has specialized in helping students strengthen foundational literacy and numeracy skills, which serve as building blocks for future academic achievement.

Her track record in the classroom reflects her commitment to measurable student growth. During her tenure at Mt. Pleasant Elementary School, Bacot was named Teacher of the Year in 2013 in recognition of her instructional excellence and positive impact on students. She also helped drive a 27 percent increase in student test scores within a single academic year through targeted interventions and structured teaching strategies.

Those accomplishments stem from a philosophy centered on consistency, preparation, and individualized instruction. Bacot believes that successful teaching requires understanding each student’s strengths, challenges, and learning style. “Students are not all starting from the same place,” Bacot explained. “Effective instruction requires flexibility and the willingness to adapt so that every child has an opportunity to succeed.”

Parents often seek tutoring when they notice their children struggling with reading comprehension,

foundational math concepts, homework completion, or overall academic confidence. Bacot notes that early intervention is one of the most effective ways to prevent small challenges from becoming larger obstacles later on.

Reading, in particular, remains one of her areas of expertise. As a certified reading specialist, she works with students to strengthen fluency, comprehension, vocabulary, and critical thinking skills. She also supports students who need assistance with mathematical concepts, helping them develop problem-solving abilities and a stronger understanding of core principles.

Her approach combines structured instruction with encouragement and relationship-building. Students benefit from clear expectations while also receiving the individualized attention often difficult to provide in larger classroom settings.

In addition to her tutoring work, Bacot recently accepted the role of lead teacher at Adams Elementary School. The appointment reflects her reputation as an instructional leader and educator committed to helping students and fellow teachers achieve success.

Despite her leadership responsibilities, Bacot remains passionate about working directly with students and families. She views tutoring as an extension of her lifelong commitment to education and student development. “As educators, our goal is to help children realize what they are capable of achieving,” Bacot said. “Sometimes that means providing additional support outside of the classroom. When students receive the help they need, they often exceed their own expectations.”

As academic expectations continue to evolve, Bacot believes personalized tutoring will remain an important resource for families seeking to strengthen their children’s skills and confidence. Through individualized instruction, encouragement, and decades of educational experience, she hopes to help more students build a foundation for long-term success.

About Kelly Bacot

Kelly Bacot is a dedicated educator with more than 24 years of classroom experience. A certified K-8 teacher, certified reading specialist, and early childhood education specialist, she holds a teaching degree from East Central University and a master’s degree in reading from Oklahoma State University. Bacot was named Teacher of the Year at Mt. Pleasant Elementary School in 2013 and helped achieve a 27% increase in student test scores during her tenure there. Known for her structured instructional approach, strong classroom leadership, and commitment to student growth, she currently serves as lead teacher at Adams Elementary School while continuing to support students through individualized tutoring services.
