

Lithosphere Opens Strategic Pre-TGE Access for AI-Native Web4 Infrastructure

The AI-powered blockchain platform expands strategic ecosystem participation ahead of its planned TGE as demand grows for autonomous Web4 infrastructure.

Singapore, Singapore Jun 8, 2026 (Issuewire.com) - [Lithosphere](#), an AI-driven blockchain infrastructure platform, has opened strategic pre-TGE access to support broader participation in its expanding AI-native ecosystem. The initiative is designed to strengthen engagement ahead of the planned LITHO Token Generation Event (TGE) while accelerating the development of infrastructure tailored for autonomous systems and Web4 environments.

The expanded access initiative reflects increasing demand for decentralized infrastructure capable of supporting intelligent execution, autonomous coordination, and scalable machine-to-machine interaction. Lithosphere's architecture integrates AI-native frameworks that enable autonomous agents, decentralized applications, and blockchain networks to coordinate efficiently across distributed ecosystems.

Through its infrastructure roadmap, Lithosphere continues to advance capabilities related to onchain agent execution, cross-chain interoperability, persistent identity systems, and verifiable coordination frameworks. These components are designed to support the emerging agent economy and next-generation Web4 ecosystems powered by intelligent automation.

[J. King Kasr](#), Chief Scientist at KaJ Labs, noted that AI-native blockchain infrastructure is becoming a critical requirement for future decentralized systems. According to Kasr, expanding strategic

participation opportunities allows ecosystem stakeholders to engage with infrastructure positioned to support autonomous coordination and scalable Web4 innovation.

The initiative aligns with the broader transition from Web3 infrastructure toward Web4 systems architecture, where autonomous agents, intelligent execution frameworks, and interoperable decentralized systems form the foundation for adaptive digital economies.

About

Lithosphere is an AI-powered blockchain platform designed to support scalable decentralized applications through intelligent automation, advanced validator infrastructure, and interoperable blockchain technologies.
